### REVIEW

1 **Enzymes of Ethylene Biosynthesis**—Hans Kende

### COMMUNICATIONS

5 **Rapid Effects of Red Light on the Isopentenyladenosine Content in Scots Pine Seeds**—Mohammed Qamaruddin* and Elisabeth Tillberg

9 **Hydrolysis of Indole-3-Acetic Acid Estes Exposed to Mild Alkaline Conditions**—Bruce G. Baldi*, Barbara R. Maher, and Jerry D. Cohen

13 **Protoplast Volume:Water Potential Relationship and Bound Water Fraction in Spinach Leaves**—Mane Santakumari and Gerald A. Berkowitz*

19 **Gibberellic Acid Effects on Greening in Pea Seedlings**—James N. Mathis*, James A. Bradburne, and Melissa A. Dupree

23 **Abscisic Acid Suppression of Phenylalanine Ammonia-Lyase Activity and mRNA, and Resistance of Soybeans to *Phytophthora megasperma* f.sp. *glycinea***—Edmund W. B. Ward*, David M. Cahill, and Madan K. Bhattacharyya

28 **Changes in Net $O_2$ Exchange Induced by Inorganic Nitrogen in the Blue-Green Alga *Anacystis nidulans***—José M. Romero*, Catalina Lara, and Mirta N. Sivak

31 **New Ways to Look at the Architecture of Plant Cell Walls. Localization of Polygalacturonate Blocks in Plant Tissues**—Joseph E. Varner* and Rosannah Taylor

34 **Purification of an $H^+$-Translocating Inorganic Pyrophosphatase from Vacuole Membranes of Red Beet**—Vahé Sarafian* and Ronald J. Poole

### ARTICLES

39 **Alteration of the Physical and Chemical Structure of the Primary Cell Wall of Growth-Limited Plant Cells Adapted to Osmotic Stress**—Naim M. Iraki, Ray A. Bressan, P. M. Hasegawa, and Nicholas C. Carpita*

48 **Cell Walls of Tobacco Cells and Changes in Composition Associated with Reduced Growth upon Adaptation to Water and Saline Stress**—Naim M. Iraki, Narendra Singh, Ray A. Bressan, and Nicholas C. Carpita*

54 **Extracellular Polysaccharides and Proteins of Tobacco Cell Cultures and Changes in Composition Associated with Growth-Limiting Adaptation to Water and Saline Stress**—Naim M. Iraki, Ray A. Bressan, and Nicholas C. Carpita*

62 **Light-Induced Polar pH Changes in Leaves of *Elodea canadensis*. I. Effects of Carbon Concentration and Light Intensity**—J. Theo M. Elzenga* and Hidde B. A. Prins

68 **Light-Induced Polar pH Changes in Leaves of *Elodea canadensis*. II. Effects of Ferricyanide: Evidence for Modulation by the Redox State of the Cytoplasm**—J. Theo M. Elzenga* and Hidde B. A. Prins

73 **Auxin Levels Regulate the Expression of a Wound-Inducible Proteinase Inhibitor II-Chloramphenicol Acetyl Transferase Gene Fusion *in Vitro* and *in Vivo***—Andrea Kernan and Robert W. Thornburg*

79 **Immunological Detection and Quantitation of Tryptophan Decarboxylase in Developing *Catharanthus roseus* Seedlings**—Jesus Alvarez Fernandez, Terence G. Owen, Wolfgang G. W. Kurz, and Vincenzo De Luca*

85 **Whole Plant Senescence of Sunflower following Seedhead Removal**—InSun Ho and Frederick E. Below*

91 **Sequential Events in the Photoinhibition of *Synechocystis* under Sodium Stress**—Jindong Zhao and Jerry J. Brand*

101 **Regulation of Embryo Dormancy by Manipulation of Abscisic Acid in Kernels and Associated Cob Tissue of *Zea mays* L. Cultured *in Vitro***—David J. Hole*, J. D. Smith, and B. Greg Cobb

106 **Isolation and Partial Characterization of a Subtilisin Inhibitor from the Mung Bean (*Vigna radiata*)**—Rani Kapur, Anna L. Tan-Wilson, and Karl A. Wilson*

113 **Variation in Binding and Virulence of *Agrobacterium tumefaciens* Chromosomal Virulence (*chv*) Mutant Bacteria on Different Plant Species**—Martha C. Hawes* and Steven G. Pueppke

119 **Immunogold Localization of the Citrus Exocortis Viroid-Induced Pathogenesis-Related Proteinase P69 in Tomato Leaves**—Pablo Vera, José Hernández-Yago, and Vicente Conejero*

124 **Cloning and Characterization of Root-Specific Barley Lectin**—David R. Lerner and Natasha V. Raikhel*

130 **Bacterial Chitinase Is Modified and Secreted in Transgenic Tobacco**—Peter Lund*, Rino Y. Lee, and Pamela Dunsmuir

136 **Characterization of Pea Chloroplast D-Enzyme (4-$\alpha$-D-Glucanotransferase)**—Genichi Kakefuda and Stanley H. Duke*

144 **Hybrid Hybridoma Cell Lines Which Express Anti-Zeatin Riboside, Anti-Abscisic Acid, and Hybrid Antibodies**—Gary M. Banowetz

148 **Kinetic Comparison of Cytokinin Nucleosidase Activity Isolated from Normally Ripening and Mutant Tomato Varieties**—Rosa S. Rolle and Grady W. Chism III*

151 **Evidence for the Involvement of a Specific Cell Wall Layer in Regulation of Deep Supercooling of Xylem Parechyma**—Michael Wisniewski* and Glen Davis

* Author to whom correspondence should be addressed.

*Continued on next page*

151 **Evidence for the Involvement of a Specific Cell Wall Layer in Regulation of Deep Supercooling of Xylem Parechyma**—Michael Wisniewski* and Glen Davis

* Author to whom correspondence should be addressed.

*Continued on next page*

157 **Effect of Ethylene Action Inhbitors upon Wound-Induced Gene Expression in Tomato Pericarp**—John M. Henstrand and Avtar K. Handa*

163 **Light Quality and Irradiance Level Interaction in the Control of Expression of Light-Harvesting Complex of Photosystem II. Pigments, Pigment-Proteins, and mRNA Accumulation**—Kenneth Eskins*, Peter Westhoff, and Phillip D. Beremand

170 **Arginine Metabolism in Developing Soybean Cotyledons. III. Utilization**—Barry J. Micallef and Barry J. Shelp*

175 **Phosphate Starvation Inducible Metabolism in *Lycopersicon esculentum*. III. Changes in Protein Secretion under Nutrient Stress**—Alan H. Goldstein*, Stephen P. Mayfield, Avihai Danon, and B. K. Tibbot

183 **Polyamine Metabolism of Potato Seed-Tubers during Long-Term Storage and Early Sprout Development**—Loretta J. Mikitzel and N. Richard Knowles*

190 **A New Reversed Phase-HPLC Method Resolving All Major Higher Plant Photosynthetic Pigments**—Javier de las Rivas, Anunciación Abadía, and Javier Abadía*

193 **A $^{14}N$ and $^{15}N$ Nuclear Magnetic Resonance Study of Nitrogen Metabolism in Shoot-Forming Cultures of White Spruce (*Picea glauca*) Buds**—Trevor A. Thorpe, Kirsten Bagh, Adrian J. Cutler, David I. Dunstan, Deane D. McIntyre, and Hans J. Vogel*

203 **Manipulating Membrane Fatty Acid Compositions of Whole Plants with Tween-Fatty Acid Esters**—William B. Terzaghi

213 **Calcium Activates an Electrogenic Proton Pump in *Neurospora* Plasma Membrane**—Roger R. Lew

217 **Immunocytochemical Localization of ADPglucose Pyrophosphorylase in Developing Potato Tuber Cells**—Taek Woo Kim, Vincent R. Franceschi, Thomas W. Okita*, Nina L. Robinson, Matthew Morrell, and Jack Preiss

221 **Effects of Inorganic Phosphate on the Light Dependent Thylakoid Energization of Intact Spinach Chloroplasts**—Dieter Heineke, Mark Stitt, and Hans W. Heldt*

227 **Root Respiration and Growth in *Plantago major* as Affected by Vesicular-Arbuscular Mycorrhizal Infection**—Rob Baas*, Adrie van der Werf, and Hans Lambers

233 **Analysis of Aluminum and Divalent Cation Binding to Wheat Root Plasma Membrane Proteins Using Terbium Phosphorescence**—Charles R. Caldwell

242 **Enzymic Analysis of Feruloylated Arabinoxylans (Feraxan) Derived from *Zea mays* Cell Walls. II. Fractionation and Partial Characterization of Feraxan Fragments Dissociated by a *Bacillus subtillis* Enzyme (Feraxanase)**—Kazuhiko Nishitani and Donald J. Nevins

249 **Direct Measurement of $K^+$ Channels in Thylakoid Membranes by Incorporation of Vesicles into Planar Lipid Bilayers**—Mark Tester* and Michael R. Blatt

253 **Control of α-Amylase Development in Cotyledons during and following Germination of Mung Bean Seeds**—Yukio Morohashi*, Hisashi Katoh, Yasuko Kaneko, and Hisashi Matsushima

259 **Sucrose Loading in Isolated Veins of *Pisum sativum*: Regulation by Abscisic Acid, Gibberellic Acid, and Cell Turgor**—Juan José Estruch, Juli G. Peretó, Yolanda Vercher, and José Pio Beltrán*

266 **Decreased Ethylene Biosynthesis, and Induction of Aerenchyma, by Nitrogen- or Phosphate-Starvation in Adventitious Roots of *Zea mays* L.**—Malcolm C. Drew*, Chuan-Jiu He, and Page W. Morgan

272 **Isolation and Partial Characterization of the Glutamate/Aspartate Transporter from Pea Leaf Mitochondria Using a Specific Monoclonal Antibody**—Jeevalatha Vivekananda and David J. Oliver*

278 **Identification of Hydroxypyruvate and Glyoxylate Reductases in Maize Leaves**—Leszek A. Kleczkowski* and Gerald E. Edwards

287 **Absence of a Formate-Induced Release of Bicarbonate from Photosystem II**—Alan Stemler

291 **Carbon Partitioning among Leaves, Fruits, and Seeds during Development of *Phaseolus vulgaris* L.**—Donald R. Geiger*, Wen-Jang Shieh, and Rose M. Saluke

298 **Role of the Plasmalemma $H^+$-ATPase in *Pseudomonas syringae*-Induced $K^+/H^+$ Exchange in Suspension-Cultured Tobacco Cells**—Merelee M. Atkinson* and C. Jacyn Baker

304 **Tungstate, a Molybdate Analog Inactivating Nitrate Reductase, Deregulates the Expression of the Nitrate Reductase Structural Gene**—Mingde Deng, Thérèse Moureaux, and Michel Caboche*

310 **Inhibitory Action of Auxin on Root Elongation Not Mediated by Ethylene**—Lennart Eliasson*, Gertrud Bertell, and Eva Bolander

315 **Effects of Gradual Increases in $O_2$ Concentration on Nodule Activity in Soybean**—Stephen Hunt*, Bryan J. King, and David B. Layzell

322 **Psychrometric Pressure-Volume Analysis of Osmoregulation in Roots, Shoots, and Whole Sporophytes of Salinized *Ceratopteris***—Robert M. Augé*, Leslie G. Hickok, and Ann J. W. Stodola

331 **Chlorophyll *a* Fluorescence Predicts Total Photosynthetic Electron Flow to $CO_2$ or $NO_3^-/NO_2^-$ under Transient Conditions**—Jody J. Holmes, Harold G. Weger, and David H. Turpin*

338 **Distribution of Endogenous Indole-3-Acetic Acid and Compression Wood Formation in Reoriented Branches of Douglas-Fir**—Brayton F. Wilson*, Ching-Te Chien, and Joe B. Zaerr

345 **Two Isozymes of Dihydroxyacetone Phosphate Reductase in *Dunaliella***—Robert Gee, Arun Goyal, Richard U. Byerrum*, and N. Edward Tolbert

352 **Oxygen and Carbon Dioxide Fluxes from Barley Shoots Depend on Nitrate Assimilation**—Arnold J. Bloom*, Richard M. Caldwell, John Finazzo, Robert L. Warner, and Joseph Weissbart

357 **Enhanced Ethylene Emissions from Red and Norway**

**Spruce Exposed to Acidic Mists**—Yi-Min Chen and Alan R. Wellburn*

362 **Gibberellins in Embryo-Suspensor of *Phaseolus coccineus* Seeds at the Heart Stage of Embryo Development**—Albert Piaggesi, Piero Picciarelli, Roberto Lorenzi, and Amedeo Alpi*

367 **Properties of a Lipoxygenase in Green Algae (*Oscillatoria* sp.)**—Jean-Louis Beneytout*, Rivo-Hery Andrianarison, Zafisolo Rakotoarisoa, and Marie Tixier

373 **Incorporation of UDP-[$^{14}$C]Glucose into Xyloglucan by Pea Membranes**—Ruth Gordon and Gordon Maclachlan*

379 **Light Adaptation/Acclimation of Photosynthesis and the Regulation of Ribulose-1,5-Bisphosphate Carboxylase Activity in Sun and Shade Plants**—Jeffrey R. Seemann

387 **Selective and Reversible Inhibition of Active $CO_2$ Transport by Hydrogen Sulfide in a Cyanobacterium**—George S. Espie*, Anthony G. Miller, and David T. Canvin

395 **Metabolism of Hydroxypyruvate in a Mutant of Barley Lacking NADH-Dependent Hydroxypyruvate Reductase, an Important Photorespiratory Enzyme Activity**—Alan J. S. Murray, Ray D. Blackwell*, and Peter J. Lea

401 **Enhanced Thermal Tolerance in a Mutant of *Arabidopsis* Deficient in Palmitic Acid Unsaturation**—Ljerka Kunst, John Browse, and Chris Somerville*

409 **Formation of the Photosynthetic Electron Transport System during the Early Phase of Greening in Barley Leaves**—Kazuko Ohashi*, Ayumi Tanaka, and Hideo Tsuji

415 **Induction of α-Amylase Inhibitor Synthesis in Barley Embryos and Young Seedlings by Abscisic Acid and Dehydration Stress**—Masumi Robertson, M. Walker-Simmons, Doug Munro, and Robert D. Hill*

421 **Properties of Pyrophosphate:Fructose-6-Phosphate Phosphotransferase from Endosperm of Developing Wheat (*Triticum aestivum* L.) Grains**—Ritu Mahajan and Randhir Singh*

427 **Decline of Activity and Quantity of Ribulose Bisphosphate Carboxylase/Oxygenase and Net Photosynthesis in Ozone-Treated Potato Foliage**—Michael S. Dann and Eva J. Pell*

433 **Water Relations of Turgor Recovery and Restiffening of Wilted Cabbage Leaves in the Absence of Water Uptake**—P. Randall Weisz*, H. C. Randall, and T. R. Sinclair

440 **Genetic Transformation of Maize Cells by Particle Bombardment**—Theodore M. Klein*, Laura Kornstein, John C. Sanford, and Michael E. Fromm

445 **Maize Photosystem I. Identification of the Subunit which Binds Plastocyanin**—R. Max Wynn, Christine Luong, and Richard Malkin*

## Number 2. October

### COMMUNICATIONS

451 **DNA Methylation Is Reduced in DNaseI-Sensitive Regions of Plant Chromatin**—Manfred Klaas and Richard M. Amasino

455 **Synthesis of Two Chromoplast-Specific Proteins during Fruit Development in *Capsicum annuum***—Lee A. Newman, Nouréddine Hadjeb, and Carl A. Price*

459 **Ribulosebisphosphate Carboxylase Activity and Photosynthetic $O_2$ Evolution Rate in *Vicia* Guard-Cell Protoplasts**—Ken-ichiro Shimazaki

464 **Timing of Growth Inhibition following Shoot Inversion in *Pharbitis nil***—A. M. Abdel-Rahman and Morris G. Cline*

466 **Effect of Asymmetric Auxin Application on *Helianthus* Hypocotyl Curvature**—Fernando Migliaccio and David L. Rayle*

469 **Species and Environmental Variations in the Effect of Inorganic Phosphate on Sucrose-Phosphate Synthase Activity. Reliability of Assays Based upon UDP Formation**—Steven J. Crafts-Bradner* and Michael E. Salvucci

473 **Production of an Antibody Specific for the Propeptide of Wheat Germ Agglutinin**—James J. Smith and Natasha V. Raikhel*

477 **Inositol Trisphosphate Metabolism in Carrot (*Daucus carota* L.) Cells**—Abdul R. Memon, Magaly Rincon, and Wendy F. Boss*

481 **Polypeptide Composition and Amino-Terminal Sequence of Broad Bean Polyphenoloxidase**—William H. Flurkey

484 **Auxins Induce α-Amylase Activity in Pea Cotyledons**—Eiji Hirasawa

### ARTICLES

487 **Role of Nonhomicity in the Regulation of Electron Transport in Plant Mitochondria**—David G. Whitehouse, Anne Catherine Fricaud, and Anthony L. Moore*

493 **Salinity Effects on Photosynthesis in Isolated Mesophyll Cells of Cowpea Leaves**—Z. Plaut*, C. M. Grieve, and E. Federman

500 **Polyamines as Modulators of Salt Tolerance in Rice Cultivars**—R. Krishnamurthy and K. A. Bhagwat*

505 **Expression of Human Carbonic Anhydrase in the Cyanobacterium *Synechococcus* PCC7942 Creates a High $CO_2$-Requiring Phenotype. Evidence for a Central Role for Carboxysomes in the $CO_2$ Con-**

centrating Mechanism—G. D. Price and M. R. Badger*

514 **Isolation and Characterization of High $CO_2$-Requiring-Mutants of the Cyanobacterium *Synechococcus* PCC7942. Two Phentoypes That Accumulate Inorganic Carbon but Are Apparently Unable to Generate $CO_2$ within the Carboxysome**—G. D. Price and M. R. Badger*

526 **Reconstitution of Oxidative Phosphorylation and of Oligomycin-Sensitive ATPase by Five- and Six-Subunit Forms of Pea Mitochondrial $F_1$-ATPase**—Arnost Horak*, Mary Packer, and Helena Horak

530 **Oxidation of Proline and Glutamate by Mitochondria of the Inflorescence of Voodoo Lily (*Sauromatum guttatum*)**—Hanna Skubatz*, Bastiaan J. D. Meeuse, and Arnold J. Bendich

536 **Oxygen-18 Content of Atmospheric Oxygen Does Not Affect the Oxygen Isotope Relationship between Environmental Water and Cellulose in a Submerged Aquatic Plant, *Egeria densa* Planch**—Lee W. Cooper* and Michael J. DeNiro

542 **Light-Induced Spectral Absorbance Changes in Relation to Photosynthesis and the Epoxidation State of Xanthophyll Cycle Components in Cotton Leaves**—Wolfgang Bilger*, Olle Björkman, and Susan S. Thayer

552 **The Heat Shock Response of Carrot. Protein Variations between Cultured Cell Lines**—Cheol Ho Hwang and J. Lynn Zimmerman*

559 **Purification and Characterization of *S*-Adenosyl-L-Methionine:6a-Hydroxymaackiain 3-*O*-Methyltransferase from *Pisum sativum***—Carol L. Preisig*, David E. Matthews, and Hans D. VanEtten

567 **Phospholipid-Dependence of Plant UDP-Glucose Sterol $\beta$-D-Glucosyl Transferase. IV. Reconstitution into Small Unilamellar Vesicles**—Alain Ury, Pierre Benveniste, and Pierrette Bouvier-Navé*

574 **Cross-Resistance to Short Residual Sulfonylurea Herbicides in Transgenic Tobacco Plants**—Jerome M. Gabard, Pierre J. Charest, V. N. Iyer, and Brian L. Miki*

581 **Pyrroline-5-Carboxylate Reductase Is in Pea (*Pisum sativum* L.) Leaf Chloroplasts**—P. John Rayapati*, Cecil R. Stewart, and Ethan Hack

587 **Synthesis of Ethanolamine and Its Regulation in *Lemna paucicostata***—S. Harvey Mudd* and Anne H. Datko

598 **Measurement of the Fractional Oxygenation of Leghemoglobin in Intact Detached Pea Nodules by Reflectance Spectroscopy**—Jonathan D. Monroe, Thomas G. Owens, and Thomas A. LaRue*

603 **Effects of Carbohydrate on the Internal Oxygen Concentration, Oxygen Uptake, and Nitrogenase Activity in Detached Pea Nodules**—Jonathan D. Monroe and Thomas A. LaRue*

610 **The Occurrence of a $Ca^{2+}$-Dependent Period in the Red Light-Induced Late G1 Phase of Germinating *Adiantum* Spores**—Moritoshi Iino*, Masami Endo, and Masamitsu Wada

617 **Seed Storage Protein Transcription and mRNA Levels in *Brassica napus* during Development and in Response to Exogenous Abscisic Acid**—Alice L. DeLisle* and Martha L. Crouch

624 **Artefactual Origins of Cyclic AMP in Higher Plant Tissues**—Anne Spiteri, Odile M. Viratelle, Philippe Raymond*, Michel Rancillac, Julie Labouesse, and Alain Pradet

629 **Distribution of Thylakoid Proteins betwen Stromal and Granal Lamellae in Spirodela. Dual Location of Photosystem II Components**—Franklin E. Callahan, William P. Wergin, Nathan Nelson, Marvin Edelman, and Autar K. Mattoo*

636 **Molecular Characterization of the Major Maize Embryo Globulin Encoded by the *Glb1* Gene**—Faith C. Belanger and Alan L. Kriz*

644 **Increased 8-Hydroxyguanine Content of Chloroplast DNA from Ozone-Treated Plants**—Robert A. Floyd*, Melinda S. West, William E. Hogsett, and David T. Tingey

648 **Relationship between Gene Dosage and Gene Expression in the Chloroplast of *Chlamydomonas reinhardtii***—Jonathan P. Hosler, Edwin A. Wurtz, Elizabeth H. Harris, Nicholas W. Gillham, and John E. Boynton*

656 **Biochemical Mechanism for Regulation of Sucrose Accumulation in Leaves during Photosynthesis**—Steven C. Huber

663 **Hydrogen Inhibition of Nitrogen Reduction by Nitrogenase in Isolated Soybean Nodule Bacteroids**—Madeline E. Rasche and Daniel J. Arp*

669 **Ethylene-Like Activity of Isocyanides**—Jeanette M. Quinn* and Shang Fa Yang

674 **Coated Vesicles Are Involved in the Transport of Storage Proteins during Seed Development in *Pisum sativum* L.**—Suzanne M. Harley and Leonard Beevers*

679 **Stromal Phosphate Concentration Is Low during Feedback Limited Photosynthesis**—Thomas D. Sharkey* and Peter J. Vanderveer

685 **Mutants of *Arabidopsis thaliana* with Decreased Amplitude in Their Phototropic Response**—Jitendra P. Khurana, Zhangling Ren, Benjamin Steinitz, Brian Parks, Thérèse R. Best, and Kenneth L. Poff*

690 **Nodule Formation Is Stimulated by the Ethylene Inhibitor Aminoethyoxyvinylglycine**—N. Kent Peters* and Deborah K. Crist-Estes

694 **Transformation of *Brassica napus* and *Brassica oleracea* using *Agrobacterium tumefaciens* and the Expression of the *bar* and *neo* Genes in the Transgenic Plants**—Marc De Block*, Dirk De Brouwer, and Paul Tenning

702 **Developmentally Regulated Expression of the Gene Family for Cytosolic Glutamine Synthetase in *Pisum sativum***—Elsbeth L. Walker and Gloria M. Coruzzi*

709 **Properties of a Polycation-Stimulated Protein Kinase Associated with Purified *Avena* Phytochrome**—Yum-Shing Wong, Robert W. McMichael, Jr., and J. Clark Lagarias*

719 **Axial and Radial Hydraulic Resistance to Roots of Maize (*Zea mays* L.)**—Jürgen Frensch* and Ernst Steudle

727 **A New Form of Chlorophyll *c* Involved in Light-Harvesting**—Marvin W. Fawley

733 **Kinetin Enhanced 1-Aminocycloproprane-1-Carboxylic Acid Utilization during Alleviation of High Temperatures Stress in Lettuce Seeds**—Anwar A. Khan* and Janusz Prusinski

738 **Polyamine Binding to Proteins in Oat and *Petunia* Protoplasts**—Yosef Mizrahi, Philip B. Applewhite, and Arthur W. Galston*

744 **Localization and Pattern of Graviresponse across the Pulvinus of Barley *Hordeum vulgare***—Thomas G. Brock*, Casey R. Lu, Najati S. Ghosheh, and Peter B. Kaufman

749 **Short-Term Metabolite Changes during Transient Ammonium Assimilation by *N*-Limited Green Alga *Selenastrum minutum***—Ronald G. Smith, Greg C. Vanlerberghe, Mark Stitt, and David H. Turpin*

756 **Diclofop-Methyl Increases the Proton Permeability of Isolated Oat-Root Tonoplast**—Denise Marie Ratterman* and Nelson E. Balke

766 **Osmotic Pressure of Aqueous Polyethylene Glycols. Relationship between Molecular Weight and Vapor Pressure Deficit**—Nicholas P. Money

770 **Functional Analysis of the Photosynthetic Apparatus of *Prochlorothrix hollandica* (Prochlorales), a Chlorophyll *b* Containing Procaryote**—Tineke Burger-Wiersma* and Anton F. Post

775 **Free and Conjugated Indole-3-Acetic Acid in Developing Bean Seeds**—Krystyna Bialek and Jerry D. Cohen*

780 **Relationships between Cadmium, Zinc, Cd-Peptide, and Organic Acid in Tobacco Suspension Cells**—Rachel M. Krotz, Bill P. Evangelou, and George J. Wagner*

788 **Selection and Characterization of *Dunaliella salina* Mutants Defective in Haloadaptation**—Edith Chitlaru and Uri Pick*

## Number 3. November

**REVIEW**

795 **Sensory Transduction and Electrical Signaling in Guard Cells**—Elba E. Serrano* and Eduardo Zeiger

**COMMUNICATIONS**

800 **Reflected Far-Red Light Effects on Chlorophyll and Light-Harvesting Chlorophyll Protein (LHC-II) Contents under Field Conditions**—James A. Bradburne, Michael J. Kasperbauer*, and James N. Mathis

804 **Auxin Physiology of the Tomato Mutant *diageotropica***—Steven G. Daniel, David L. Rayle*, and Robert E. Cleland

808 **Cytokinin-to-Auxin Ratios and Morphology of Shoots and Tissues Transformed by a Chimeric Isopentenyl Transferase Gene**—Ann C. Smigocki* and Lowell D. Owens

812 **Enhanced-Peroxidatic Activity in Specific Catalase Isozymes of Tobacco, Barley, and Maize**—Evelyn A. Havir* and Neil A. McHale

**ARTICLES**

816 **Tomato Fruit Cell Wall. I. Use of Purified Tomato Polygalacturonase and Pectinmethylesterase to Identify Developmental Changes in Pectins**—James L. Koch and Donald J. Nevins*

823 **Competition for *in Vitro* [$^3$H]Gibberellin $A_4$ Binding in Cucumber by Substituted Phthalimides. Comparison with *in Vivo* Gibberellin-Like Activity**—Nasser Yalpani, Jeffrey C. Suttle*, Julie F. Hultstrand, and Shirley J. Rodaway

829 **Characterization of a Radish Nuclear Gene Expressed during Late Seed Maturation**—Monique Raynal, Dominique Depigny, Richard Cooke, and Michel Delseny*

837 **Hypoxic Induction of Anoxia Tolerance in Root Tips of *Zea mays***—James Johnson, B. Greg Cobb, and Malcolm C. Drew*

842 **A Chalcone and Two Related Flavonoids Released from Alfalfa Roots Induce *nod* Genes of *Rhizobium meliloti***—Carl A. Maxwell, Ueli A. Hartwig, Cecillia M. Joseph, and Donald A. Phillips*

848 **Whole Leaf Carbon Exchange Characteristics of Phosphate Deficient Soybeans (*Glycine max.* L.)**—Michael J. Lauer, Stephen G. Pallardy, Dale G. Blevins*, and Douglas D. Randall

855 **Stable NaCl Tolerance of Tobacco Cells Is Associated with Enhanced Accumulation of Osmotin**—P. Christopher LaRosa*, Narendra K. Singh, Paul M. Hasegawa, and Ray A. Bressan

862 **Water Deficits and Reproduction in Maize. Response of the Reproductive Tissue to Water Deficits at Anthesis and Mid-Grain Fill**—Mark E. Westgate* and D. Thomson Grant

868 **Purification and Characterization of Two Forms of Glutamine Synthetase from the Pedicel Region of Maize (*Zea mays* L.) Kernels**—Michael J. Muhitch

876 **Culm Strength of Barley. Correlation among Maximum Bending Stress, Cell Wall Dimensions, and Cellulose Content**—Akira Kokubo, Susumu Kuraishi*, and Naoki Sakurai

883 **Oxygen Inhibition of Nitrate Reductase Biosynthesis in Detached Corn Leaves via Inhibition of Total Soluble Protein Synthesis**—Juana D. Kenis and Wilbur H. Campbell*

889 **Elicitation of Lignin Biosynthesis and Isoperoxidase Activity by Pectic Fragments in Suspension Cul-**

tures of Castor Bean—Robert J. Bruce* and Charles A. West

898 **Nitrogen Assimilating Enzyme Activities and Enzyme Protein during Development and Senescence of Effective and Plant Gene-Controlled Ineffective Alfalfa Nodules**—Margaret A. Egli*, Stephen M. Griffith, Susan S. Miller, Michael P. Anderson, and Carroll P. Vance

905 **Influence of Low Temperature on Respiration and Contents of Phosphorylated Intermediates in Darkened Barley Leaves**—Carlos A. Labate and Richard C. Leegood*

911 **Increase of Chalcone Synthase mRNA in Pathogen-Inoculated Soybeans with Race-Specific Resistance Is Different in Leaves and Roots**—Shree Dhawale, Ginette Souciet, and David N. Kuhn*

917 **Pyrroline-5-Carboxylate Reductase in *Chlorella autotrophica* and *Chlorella saccharophila* in Relation to Osmoregulation**—Gilles Laliberté* and Johan A. Hellebust

924 **Effect of Growth Temperature on the Biosynthesis of Chloroplastic Galactosyldiacylglycerol Molecular Species in *Brassica napus* Leaves**—Geoff Johnson and John P. Williams*

930 **Effects of Cold-Treatment on Protein Synthesis and mRNA Levels in Rice Leaves**—Matthias Hahn* and Virginia Walbot

939 **Analysis of Chromophytic and Rhodophytic Ribulose-1,5-Bisphosphate Carboxylase Indicates Extensive Structural and Functional Similarities among Evolutionarily Diverse Algae**—Scott M. Newman, Jay Derocher, and Rose Ann Cattolico*

947 **Nitrate Transport Is Independent of NADH and NAD(P)H Nitrate Reductases in Barley Seedlings**—Robert L. Warner* and Ray C. Huffaker

954 **Malate-Induced Hysteresis of Phospho*enol*pyruvate Carboxylase from *Crassula argentea***—Apinya Ngam-ek, Thomas A. P. Seery, Eric J. Amis, and Scott D. Grover*

961 **Parallel Effects of Freezing and Osmotic Stress on the ATPase Activity and Protein Composition of the Plasma Membrane of Winter Rye Seedlings**—Matsuo Uemura and Peter L. Steponkus*

970 **Low $CO_2$ Prevents Nitrate Reduction in Leaves**—Werner M. Kaiser* and Jutta Förster

975 **Effect of Water Deficits on Seed Development in Soybean. I. Tissue Water Status**—Mark E. Westgate* and D. Thomson Grant

980 **Effect of Water Deficits on Seed Development in Soybean. II. Conservation of Seed Growth Rate**—Mark E. Westgate*, J. R. Schussler, D. C. Reicosky, and M. L. Brenner

986 **Roles of Carbohydrate Supply and Phytohormones in Maize Kernel Abortion**—Andrew J. Reed* and George W. Singletary

993 **Purification and Characterization of Soluble (Cytosolic) and Bound (Cell Wall) Isoforms of Invertases in Barley (*Hordeum vulgare*) Elongating Stem Tissue**—Nadarajah Karuppiah*, Babu Vadlamudi, and Peter B. Kaufman

999 **Change in Photosynthetic Capacity over the Cell Cycle in Light/Dark-Synchronized *Amphidinium carteri* Is Due Solely to the Photocycle**—Mark W. Gerath and Sallie W. Chisholm*

1006 **An Abundant, Highly Conserved Tonoplast Protein in Seeds**—Kenneth D. Johnson*, Eliot M. Herman, and Maarten J. Chrispeels

1014 **Purification and Identification of a Plasma Membrane Associated Electron Transport Protein from Maize (*Zea mays* L.) Roots**—Douglas G. Luster and Thomas J. Buckhout*

1020 **Inheritance and Expression of the Mouse Metallothionein Gene in Tobacco. Impact on Cd Tolerance and Tissue Cd Distribution in Seedlings**—Indu B. Maiti, George J. Wagner*, Ricky Yeargan, and Arthur G. Hunt

1025 **Effects of 3-(3,4-Dichlorophenyl)-1,1-Dimethylurea on the Cell Cycle in *Euglena gracilis***—Muh-ching Yee and James C. Bartholomew*

1030 **Blue-Light Regulation of Specific Transcript Levels in *Pisum sativum*. Fluence-Response, Time-Course, and Reciprocity Characteristics**—Katherine M. F. Warpeha, Kathleen A. Marrs, and Lon S. Kaufman*

1036 **Inactivation of 1-Aminocyclopropane-1-Carboxylate Synthase by L-Vinylglycine as Related to the Mechanism-Based Inactivation of the Enzyme by *S*-Adenosyl-L-Methionine**—Shigeru Satoh* and Shang Fa Yang

1040 **Mode of Action of the Massively Accumulated $\beta$-Carotene of *Dunaliella bardawil* in Protecting the Alga against Damage by Excess Irradiation**—Ami Ben-Amotz, Aviv Shaish, and Mordhay Avron*

1044 **Glycolaldehyde Inhibits $CO_2$ Fixation in the Cyanobacterium *Synechococcus* UTEX 625 without Inhibiting the Accumulation of Inorganic Carbon or the Associated Quenching of Chlorophyll *a* Fluorescence**—Anthony G. Miller* and David T. Canvin

1050 **Kinetic Properties of Phospho*enol*pyruvate Carboxylase in *Peperomia camptoricha***—Deborah L. Sipes and Irwin P. Ting*

1056 **Subunit Composition of Glutamine Synthetase Isozymes from Root Nodules of Bean (*Phaseolus vulgaris* L.)**—Xiaoyin Cai and Peter P. Wong*

1063 **Metabolic Acclimation to Hypoxia in Winter Cereals. Low Temperature Flooding Increases Adenylates and Survival in Ice Encasement**—Christopher J. Andrews* and M. Keith Pomeroy

1069 **The Nature of Light-Induced Inhibition of Photosystem II in Pumpkin (*Cucurbita pepo* L.) Leaves Depends on Temperature**—Esa Tyystjärvi*, Jari Ovaska, Pirjo Karunen, and Eva-Mari Aro

1075 **Comparison of the Oxygen Exchange between Photosynthetic Cell Suspensions and Detached Leaves of *Euphorbia characias* L.**—Patrick Carrier, Pierre Chagvardieff, and Pierre Tapie*

1080 **Characterization and Rooting Ability of Indole-3-Butyric Acid Conjugates Formed during Rooting of Mung Bean Cuttings**—Zeev Wiesman, Joseph Riov*, and Ephraim Epstein

1085 **Glycolate Metabolism in Low and High $CO_2$-Growth *Chlorella pyrenoidosa* and *Pavlova lutheri* as De-**

termined by $^{18}O$-Labeling—Edward J. de Veau* and John E. Burris

1094 Kinetics of Aluminum Uptake by Excised Roots of Aluminum-Tolerant and Aluminum-Sensitive Cultivars of *Triticum aestivum* L.—Guichang Zhang* and Gregory J. Taylor

1100 Kinetics of Chlorophyll Accumulation and Formation of Chlorophyll-Protein Complexes during Greening of *Chlamydomonas reinhardtii y-1* at 38°C—Margaret A. Maloney, J. Kenneth Hoober*, and Dawn B. Marks

1107 Characteristics of the $Mg^{2+}$-ATPase Activity Associated with the Membrane-Bound Maize Coupling Factor—William S. Cohen

1112 Development of Two Isogenic Sweet Corn Hybrids Differing for Glycinebetaine Content—David Rhodes*, Patrick J. Rich, Dennis G. Brunk, Grace C. Ju, Judith C. Rhodes, Michael H. Pauly, and Leon A. Hansen

1122 Genotypic Variation for Glycinebetaine among Public Inbreds of Maize—Dennis G. Brunk, Patrick J. Rich, and David Rhodes*

1126 Activity of Ageing Carnation Flower Parts and the Effects of 1-(Malonylamino)cyclopropane-1-Carboxylic Acid-Induced Ethylene—Kathleen M. Hanley*, Shimon Meir, and William J. Bramlage

1131 Effect of Cold Acclimation on the Incidence of Two Forms of Freezing Injury in Protoplasts Isolated from Rye Leaves—Matsuo Uemura and Peter L. Steponkus*

1138 Interactions among Flavonoid *nod* Gene Inducers Released from Alfalfa Seeds and Roots—Ueli A. Hartwig, Carl A. Maxwell, Cecillia M. Joseph, and Donald A. Phillips*

1143 Effects of Polyploidy on Photosynthetic Rates, Photosynthetic Enzymes, Contents of DNA, Chlorophyll, and Sizes and Numbers of Photosynthetic Cells in the $C_4$ Dicot *Atriplex confertifolia*—Donn A. Warner and Gerald E. Edwards*

1152 Role of Nitrate and Nitrite in the Induction of Nitrite Reductase in Leaves of Barley Seedlings—Muhammad Aslam and Ray C. Huffaker*

1157 Light Regulation of β-Tubulin Gene Expression during Internode Development in Soybean (*Glycine max* [L.] Merr.)—Mauricio M. Bustos, Mark J. Guiltinan, Richard J. Cy, David Ahdoot, and Donald E. Fosket*

1162 Heliotropic Leaf Movements in Common Beans Controlled by Air Temperature—Qingnong A. Fu* and James R. Ehleringer

1168 Coregulation of Dihydrofolate Reductase and Thymidylate Synthase in Overproducer Cell Lines of Wild Carrot—Gabor Lazar, Ildiko Toth, Letitia Haakonsen, and Howard M. Goodman*

1174 Increased Tolerance to Photoinhibitory Light in Paraquat-Resistant *Conyza bonariensis* Measured by Photoacoustic Spectroscopy and $^{14}CO_2$-Fixation—Marcel A. K. Jansen, Yoseph Shaaltiel, Dror Kazzes, Ora Canaani, Shmuel Malkin, and Jonathan Gressel*

1179 Stoichiometry of Photosystem I, Photosystem II, and Phycobilisomes in the Red Alga *Porphyridium cruenteum* as a Function of Growth Irradiance—Francis X. Cunningham, Jr., Ronald J. Dennenberg, László Mustárdy, Paul A. Jursinic, and Elisabeth Gantt*

1188 Mechanisms of Aluminum Tolerance in Wheat. An Investigation of Genotypic Differences in Rhizosphere pH, $K^+$, and $H^+$ Transport, and Root-Cell Membrane Potentials—Susan C. Miyasaka, Leon V. Kochian*, Jon E. Shaff, and Charles D. Foy

1197 Polyamines in Rice Seedlings under Oxygen-Deficit Stress—Remo Reggiani*, Alejandro Hochkoeppler, and Alcide Bertani

1202 High Affinity $K^+$ Uptake in Maize Roots. A Lack of Coupling with $H^+$ Efflux—Leon V. Kochian*, Jon E. Shaff, and William J. Lucas

1212 Transformation of Soybean (*Glycine max*) by Infecting Germinating Seeds with *Agrobacterium tumefaciens*—Paula P. Chee*, Krystal A. Fober, and Jerry L. Slightom

1219 Spatial and Temporal Influences on the Cell-Specific Distribution of Glycine Decarboxylase in Leaves of Wheat (*Triticum aestivum* L.) and Pea (*Pisum sativum* L.)—Alyson K. Tobin*, Julian R. Thorpe, Christopher M. Hylton, and Stephen Rawsthorne

1226 Primary Site of Action of Amitrole in *Arabidopsis thaliana* Involves Inhibition of Root Elongation but Not of Histidine or Pigment Biosynthesis—Dale R. Heim and Ignacio M. Larrinua*

1232 Increased Proteolysis of Senescing Rice Leaves in the Presence of NaCl and KCl—Seong-Mo Kang and John S. Titus*

1238 Correction

## Number 4. December

**REVIEW**

1239 $Ca^{2+}$-Selective Microelectrodes and Their Application to Plant Cells and Tissues—Hubert Felle

**COMMUNICATIONS**

1243 Xenobiotic Monitoring in Plants by $^{19}F$ and $^1H$ Nuclear Magnetic Resonance Imaging and Spectroscopy. Uptake of Trifluoroacetic Acid in *Lycopersicon esculentum*—Andrew Rollins, Jill Barber*, Raymond Elliott, and Brian Wood

1247 Springback in Root Gravitropism—A. Carl Leopold* and Scott H. Wettlaufer

1251 Role of Ethylene in the Geotropic Response of Bermudagrass (*Cynodon dactylon* L. Pers.) Stolons—Pedro A. Balatti* and Jorge G. Willemöes

1255 **Further Identification of Endogenous Gibberellins in the Shoots of Pea, Line G2**—Anna Halinska, Peter J. Davies*, James W. Lee, and Yu-Xian Zhu

1259 **Antibodies against the Calcium-Binding Protein. Calsequestrin from *Streptanthus tortuosus* (Brassicaceae)**—Mei Chou, Karl-Heinz Krause, Kevin P. Campbell, Kenneth G. Jensen, and Richard D. Siolund*

1262 **Effects of Sodium Chloride on the Hydraulic Conductivity of Soybean Root Systems**—Robert J. Joly

1266 **Phosphoinositides in Barley Aleurone Layers and Gibberellic Acid-Induced Changes in Metabolism**—Pushpalatha P. N. Murthy*, Jill M. Renders, and Lisa M. Keranen

1270 **Transient Expression of Chimeric Genes Delivered into Pollen by Microprojectile Bombardment**—David Twell, Theodore M. Klein, Michael E. Fromm, and Sheila McCormick*

1275 **Characterization of a Polyphosphoinositide Phospholipase C from the Plasma Membrane of *Avena sativa***—Bonnie F. Tate*, G. Eric Schaller, Michael R. Sussman, and Richard C. Crain

1280 **An Enzymatic Conversion of Lipoxygenase Products by a Hydroperoxide Lyase in Blue-Green Algae (*Oscillatoria* sp.)**—Rivo-Hery Andrianarison, Jean-Louis Beneytout*, and Marie Tixier

1288 **Lysophosphatidate Acyltransferase Activities in the Microsomes from Palm Endosperm, Maize Scutellum, and Rapeseed Cotyledon of Maturing Seeds**—Khaik-Cheang Oo and Anthony H. C. Huang*

1296 **Effects of *Helminthosporium maydis* Race T Toxin on Electron Transport in Susceptible Corn Mitochondria and Prevention of Toxin Actions by Dicyclohexylcarbodiimide**—Marcia J. Holden* and Heven Sze

1303 **Properties of Solubilized Microsomal Lipase from Germinating *Brassica napus***—Randall J. Weselake, Lawrence W. Thomson, Don Tenaschuk, and Samuel L. MacKenzie*

1308 **Low Growth Temperature-Induced Increase in Light Saturated Photosystem I Electron Transport Is Cation Dependent**—Norman P. A. Huner* and Tracey L. Reynolds

1317 **Carrier-Mediated Uptake of 1-(Malonylamino)-cyclopropane-1-Carboxylic Acid in Vacuoles Isolated from *Catharanthus roseus* Cells**—Mondher Bouzayen, Alain Latché, Jean-Claude Pech*, and Gérard Marigo

1323 **Flavanone Glycoside Biosynthesis in *Citrus*. Chalcone Synthase, UDP-Glucose:Flavanone-7-*O*-Glucosyl-Transferase and -Rhamnosyl-Transferase Activities in Cell-Free Extracts**—Efraim Lewinsohn, Lothar Britsch, Yehuda Mazur, and Jonathan Gressel*

1329 **Gravitropism in Higher Plant Shoots. VI. Changing Sensitivity to Auxin in Gravistimulated Soybean Hypocotyls**—Patricia A. Rorabaugh and Frank B. Salisbury*

1339 **Temperature-Induced Protein Conformational Changes in Barley Root Plasma Membrane-Enriched Microsomes. III. Effect of Temperature and Cations on Protein Sulfhydryl Reactivity**—Charles R. Caldwell

1345 **Cyclic Variations in Nitrogen Uptake Rate of Soybean Plants. Ammonium as a Nitrogen Source**—Leslie Tolley Henry* and C. David Raper, Jr.

1351 **Abscisic Acid Levels during Early Seed Development in *Sechium edule* Sw.**—Paolo Vernieri*, Pierdomenico Perata, Roberto Lorenzi, and Nello Ceccarelli

1356 **Inorganic Carbon Diffusion between $C_4$ Mesophyll and Bundle Sheath Cells. Direct Bundle Sheath $CO_2$ Assimilation in Intact Leaves in the Presence of an Inhibitor of the $C_4$ Pathway**—Colin L. D. Jenkins*, Robert T. Furbank, and Marshall D. Hatch

1364 **$CO_2$ Concentrating Mechanism of $C_4$ Photosynthesis. Permeability of Isolated Bundle Sheath Cells to Inorganic Carbon**—Robert T. Furbank, Colin L. D. Jenkins*, and Marshall D. Hatch

1372 **Mechanism of $C_4$ Photosynthesis. A Model Describing the Inorganic Carbon Pool in Bundle Sheath Cells**—Colin L. D. Jenkins*, Robert T. Furbank, and Marshall D. Hatch

1382 ***In Vivo* Biosynthetic Studies of the *Dolichos biflorus* Seed Lectin**—Jeanette M. Quinn and Marilynn E. Etzler*

1387 **Peroxisomal Degradation of Branched-Chain 2-Oxo Acids**—Heidrun Gerbling and Bernt Gerhardt*

1393 **Structural Similarities between Spinach Chloroplast and Cytosolic Class I Fructose 1,6-Bisphosphate Aldolases. Immunochemical and Amino-Terminal Amino Acid Sequence Analysis**—James J. Marsh, Kenneth J. Wilson, and Herbert G. Lebherz*

1402 **Properties of Proteoliposomes Containing Fusicoccin Receptors from Maize**—Patrizia Aducci, Maria Rosaria Fullone, and Alessandro Ballio*

1407 **Competitive $Al^{3+}$ Inhibition of Net $Mg^{2+}$ Uptake by Intact *Lolium multiflorum* Roots. I. Kinetics**—Zdenko Rengel* and Donald L. Robinson

1414 **Proteolytic Activity at Alkaline pH in Oat Leaves, Isolation of an Aminopeptidase**—Leonardo M. Casano, Marcelo Desimone, and Victorio S. Trippi*

1419 **Monoclonal Antibodies against Pectin. Recognition of a Conformation Induced by Calcium**—Françoise Liners, Jean-Jacques Letesson, Christian Didembourg, and Pierre Van Cutsem*

1425 **Isolation and Characterization of Protein Bodies in *Lupinus angustifolius***—Kenwyn R. Gayler*, Friederika Wachsmann, Sotirios Kolivas, Roslyn Nott, and Elizabeth D. Johnson

1432 **Stress-Induced Accumulation of Wheat Germ Agglutinin and Abscisic Acid in Roots of Wheat Seedlings**—Bruno P. A. Cammue*, Willem F. Broekaert, Jan T. C. Kellens, Natasha V. Raikhel, and Willy J. Peumans

1436 **Banana Ripening: Implications of Changes in Glycolytic Intermediate Concentrations, Glycolytic and Gluconeogenic Carbon Flux, and Fructose 2,6-Bis-**

**phosphate Concentration**—Randolph M. Beaudry*, Ray F. Severson, Clanton C. Black, and Stanley J. Kays

1445 **Purification and Characterization of Pectinmethylesterase from *Ficus awkeotsang* Makino Achenes**—Tsan-Piao Lin*, Chih-Chen Liu, Shun-Wen Chen, and Wei-Yang Wang

1454 **Negative Pressures Produced in an Artificial Osmotic Cell by Extracellular Freezing**—Jian Jun Zhu, Ernst Steudle*, and Erwin Beck

1460 **Increased Potassium Absorption Confers Resistance to Group IA Cations in Rubidium-Selected Suspension Cells of *Brassica napus***—Daniel D. Lefebvre

1467 **Abscisic Acid ELISA: Organic Acid Interference**—Helen Belefant and Franklin Fong*

1471 **Sensitivity of Altitudinal Ecotypes of the Wild Tomato *Lycopersicon hirsutum* to Chilling Injury**—John K. Raison* and Murray A. Brown

1476 **Intracellular Localization of Enzymes of Fatty Acid-$\beta$-Oxidation in the Alga *Cyanidium caldarium***—Wolfgang Gross

1481 **Novel Procedure for Extraction of a Latent Grape Polyphenoloxidase Using Temperature-Induced Phase Separation in Triton X-114**—Alvaro Sánchez-Ferrer, Roque Bru, and Francisco Garcia-Carmona*

1488 **Isolation of Gibberellin Precursors from Heavily Pigmented Tissues**—James D. Metzger* and Jan P. Hazebroek

1494 **Low and High Temperature Limits to PSII. A Survey Using *trans*-Parinaric Acid, Delayed Light Emission, and $F_o$ Chlorophyll Fluorescence**—William B. Terzaghi*, David C. Fork, Joseph A. Berry, and Christopher B. Field

1501 **Effects of Ambient and Acute Partial Pressures of Ozone on Leaf Net $CO_2$ Assimilation of Field-Grown *Vitis vinifera* L.**—Teryl R. Roper and Larry E. Williams*

1507 **Phosphate Translocator of Mesophyll and Bundle Sheath Chloroplasts of a $C_4$ Plant, *Panicum miliaceum* L. Identification and Kinetic Characterization**—Jun-ichi Ohnishi*, Ulf Ingo Flügge, and Hans W. Heldt

1512 **Photosynthetic Carbon Metabolism in Photoautotrophic Cell Suspension Cultures Grown at Low and High $CO_2$**—Chrissl A. Roeske, Jack M. Widholm, and William L. Ogren*

1520 **Heat-Stable Proteins and Abscisic Acid Action in Barley Aleurone Cells**—John V. Jacobsen* and Denis C. Shaw

1527 **Sucrose Phosphate Synthase and Acid Invertase as Determinants of Sucrose Concentration in Developing Muskmelon (*Cucumis melo* L.) Fruits**—Natalie L. Hubbard, Steven C. Huber, and D. Mason Pharr*

1535 **Subunit Composition of Cytochrome *c* Oxidase in Mitochondria of *Zea mays***—Malcolm J. Hawkesford, Andrew D. Liddell, and Christopher J. Leaver*

1543 **Leaf Anatomy of $C_3$-$C_4$ Species as Related to Evolution of $C_4$ Photosynthesis**—R. Harold Brown* and Paul W. Hattersley

1551 **Anaerobic Carbon Metabolism by the Tricarboxylic Acid Cycle. Evidence for Partial Oxidative and Reductive Pathways during Dark Ammonium Assimilation**—Greg C. Vanlerberghe, Anne K. Horsey, Harold G. Weger, and David H. Turpin*

1558 **Growth and Development Temperature Influences Level of Tolerance to High Light Stress**—Kenneth L. Steffen and Jiwan P. Palta*

1562 **Limitation of $CO_2$ Assimilation and Regulation of Benson-Calvin Cycle Activity in Barley Leaves in Response to Changes in Irradiance, Photoinhibition, and Recovery**—Marie Djuardyn and Christine H. Foyer*

1569 **Purification and Interconversion of Homoserine Dehydrogenase from *Daucus carota* Cell Suspension Cultures**—Benjamin F. Matthews*, Margaret J. Farrar, and Ann C. Gray

1575 **Increased Gene Expression by the First Intron of Maize *Shrunken-1* Locus in Grass Species**—Vimla Vasil*, Maureen Clancy, Robert J. Ferl, Indra K. Vasil, and L. Curtis Hannah

1580 **Combined Low Temperature-High Light Effects on Gas Exchange Properties of Jojoba Leaves**—Francesco Loreto* and Guido Bongi

1586 **A Novel Effect in *Phycomyces* Phototropism. Positive Bending and Compensation Spectrum in Far UV**—Teodor Popescu, Andreas Roessler, and Leonid Fukshansky*

1594 **Evidence for a Universal Pathway of Abscisic Acid Biosynthesis in Higher Plants from $^{18}O$ Incorporation Patterns**—Jan A. D. Zeevaart*, Timothy G. Heath, and Douglas A. Gage

1602 **Purification and Characterization of Lysine-Sensitive Aspartate Kinase from Maize Cell Cultures**—Stanton B. Dotson, David A. Somers, and Burle G. Gengenbach*

1609 **Hormonal Regulation and Distribution of Peroxidase Isoenzymes in the Cucurbitaceae**—Fred B. Abeles*, Charles L. Biles, and Linda J. Dunn

1613 **Detection of a Calcium-Activated Protein Kinase in *Mougeotia* by Using Synthetic Peptide Substrates**—Daniel M. Roberts

1620 **Light/Dark Modulation of Enzyme Activity in Developing Barley Leaves**—Marion H. Sibley and Louise E. Anderson*

1625 **Water Transport in the Liana *Bauhinia fassoglensis* (Fabaceae)**—Frank W. Ewers*, Jack B. Fisher, and Shau-Ting Chiu

1632 **Corrections**

# Volume Contents by Subject

## METABOLISM AND ENZYMOLOGY

28 **Changes in Net $O_2$ Exchange Induced by Inorganic Nitrogen in the Blue-Green Alga *Anacystis nidulans*—**José M. Romero*, Catalina Lara, and Mirta N. Sivak

79 **Immunological Detection and Quantitation of Tryptophan Decarboxylase in Developing *Catharanthus roseus* Seedlings—**Jesus Alvarez Fernandez, Terence G. Owen, Wolfgang G. W. Kurz, and Vincenzo De Luca*

106 **Isolation and Partial Characterization of a Subtilisin Inhibitor from the Mung Bean (*Vigna radiata*)—**Rani Kapur, Anna L. Tan-Wilson, and Karl A. Wilson*

136 **Characterization of Pea Chloroplast D-Enzyme (4-α-D-Glucanotransferase)—**Genichi Kakefuda and Stanley H. Duke*

148 **Kinetic Comparison of Cytokinin Nucleosidase Activity Isolated from Normally Ripening and Mutant Tomato Varieties—**Rosa S. Rolle and Grady W. Chism III*

170 **Arginine Metabolism in Developing Soybean Cotyledons. III. Utilization—**Barry J. Micallef and Barry J. Shelp*

193 **A $^{14}N$ and $^{15}N$ Nuclear Magnetic Resonance Study of Nitrogen Metabolism in Shoot-Forming Cultures of White Spruce (*Picea glauca*) Buds—**Trevor A. Thorpe, Kirsten Bagh, Adrian J. Cutler, David I. Dunstan, Deane D. McIntyre, and Hans J. Vogel*

221 **Effects of Inorganic Phosphate on the Light Dependent Thylakoid Energization of Intact Spinach Chloroplasts—**Dieter Heineke, Mark Stitt, and Hans W. Heldt*

278 **Identification of Hydroxypyruvate and Glyoxylate Reductases in Maize Leaves—**Leszek A. Kleczkowski* and Gerald E. Edwards

331 **Chlorophyll *a* Fluorescence Predicts Total Photosynthetic Electron Flow to $CO_2$ or $NO_3^-/NO_2^-$ under Transient Conditions—**Jody J. Holmes, Harold G. Weger, and David H. Turpin*

345 **Two Isozymes of Dihydroxyacetone Phosphate Reductase in *Dunaliella*—**Robert Gee, Arun Goyal, Richard U. Byerrum*, and N. Edward Tolbert

367 **Properties of a Lipoxygenase in Green Algae (*Oscillatoria* sp.)—**Jean-Louis Beneytout*, Rivo-Hery Andrianarison, Zafisolo Rakotoarisoa, and Marie Tixier

373 **Incorporation of UDP-[$^{14}$C]Glucose into Xyloglucan by Pea Membranes—**Ruth Gordon and Gordon Maclachlan*

395 **Metabolism of Hydroxypyruvate in a Mutant of Barley Lacking NADH-Dependent Hydroxypyruvate Reductase, an Important Photorespiratory Enzyme Activity—**Alan J. S. Murray, Ray D. Blackwell*, and Peter J. Lea

421 **Properties of Pyrophosphate:Fructose-6-Phosphate Phosphotransferase from Endosperm of Developing Wheat (*Triticum aestivum* L.) Grains—**Ritu Mahajan and Randhir Singh*

459 **Ribulosebisphosphate Carboxylase Activity and Photosynthetic $O_2$ Evolution Rate in *Vicia* Guard-Cell Protoplasts—**Ken-ichiro Shimazaki

469 **Species and Environmental Variations in the Effect of Inorganic Phosphate on Sucrose-Phosphate Synthase Activity. Reliability of Assays Based upon UDP Formation—**Steven J. Crafts-Bradner* and Michael E. Salvucci

477 **Inositol Trisphosphate Metabolism in Carrot (*Daucus carota* L.) Cells—**Abdul R. Memon, Magaly Rincon, and Wendy F. Boss*

481 **Polypeptide Composition and Amino-Terminal Sequence of Broad Bean Polyphenoloxidase—**William H. Flurkey

505 **Expression of Human Carbonic Anhydrase in the Cyanobacterium *Synechococcus* PCC7942 Creates a High $CO_2$-Requiring Phenotype. Evidence for a Central Role for Carboxysomes in the $CO_2$ Concentrating Mechanism—**G. D. Price and M. R. Badger*

514 **Isolation and Characterization of High $CO_2$-Requiring-Mutants of the Cyanobacterium *Synechococcus* PCC7942. Two Phentoypes That Accumulate Inorganic Carbon but Are Apparently Unable to Generate $CO_2$ within the Carboxysome—**G. D. Price and M. R. Badger*

559 **Purification and Characterization of *S*-Adenosyl-L-Methionine:6a-Hydroxymaackiain 3-*O*-Methyltransferase from *Pisum sativum*—**Carol L. Preisig*, David E. Matthews, and Hans D. VanEtten

587 **Synthesis of Ethanolamine and Its Regulation in *Lemna paucicostata*—**S. Harvey Mudd* and Anne H. Datko

656 **Biochemical Mechanism for Regulation of Sucrose Accumulation in Leaves during Photosynthesis—**Steven C. Huber

663 **Hydrogen Inhibition of Nitrogen Reduction by Nitrogenase in Isolated Soybean Nodule Bacteroids—**Madeline E. Rasche and Daniel J. Arp*

679 **Stromal Phosphate Concentration Is Low during Feedback Limited Photosynthesis—**Thomas D. Sharkey* and Peter J. Vanderveer

709 **Properties of a Polycation-Stimulated Protein Kinase Associated with Purified *Avena* Phytochrome—**Yum-Shing Wong, Robert W. McMichael, Jr., and J. Clark Lagarias*

749 **Short-Term Metabolite Changes during Transient Ammonium Assimilation by *N*-Limited Green Alga *Selenastrum minutum*—**Ronald G. Smith, Greg C. Vanlerberghe, Mark Stitt, and David H. Turpin*

812 **Enhanced-Peroxidatic Activity in Specific Catalase Isozymes of Tobacco, Barley, and Maize—**Evelyn A. Havir* and Neil A. McHale

848 **Whole Leaf Carbon Exchange Characteristics of Phosphate Deficient Soybeans (*Glycine max.* L.)—**Michael J. Lauer, Stephen G. Pallardy, Dale G. Blevins*, and Douglas D. Randall

868 **Purification and Characterization of Two Forms of Glutamine Synthetase from the Pedicel Region of Maize (*Zea mays* L.) Kernels**—Michael J. Muhitch

905 **Influence of Low Temperature on Respiration and Contents of Phosphorylated Intermediates in Darkened Barley Leaves**—Carlos A. Labate and Richard C. Leegood*

939 **Analysis of Chromophytic and Rhodophytic Ribulose-1,5-Bisphosphate Carboxylase Indicates Extensive Structural and Functional Similarities among Evolutionarily Diverse Algae**—Scott M. Newman, Jay Derocher, and Rose Ann Cattolico*

947 **Nitrate Transport Is Independent of NADH and NAD(P)H Nitrate Reductases in Barley Seedlings**—Robert L. Warner* and Ray C. Huffaker

954 **Malate-Induced Hysteresis of Phospho*enol*pyruvate Carboxylase from *Crassula argentea***—Apinya Ngam-ek, Thomas A. P. Seery, Eric J. Amis, and Scott D. Grover*

993 **Purification and Characterization of Soluble (Cytosolic) and Bound (Cell Wall) Isoforms of Invertases in Barley (*Hordeum vulgare*) Elongating Stem Tissue**—Nadarajah Karuppiah*, Babu Vadlamudi, and Peter B. Kaufman

1030 **Blue-Light Regulation of Specific Transcript Levels in *Pisum sativum*. Fluence-Response, Time-Course, and Reciprocity Characteristics**—Katherine M. F. Warpeha, Kathleen A. Marrs, and Lon S. Kaufman*

1036 **Inactivation of 1-Aminocyclopropane-1-Carboxylate Synthase by L-Vinylglycine as Related to the Mechanism-Based Inactivation of the Enzyme by *S*-Adenosyl-L-Methionine**—Shigeru Satoh* and Shang Fa Yang

1044 **Glycolaldehyde Inhibits $CO_2$ Fixation in the Cyanobacterium *Synechococcus* UTEX 625 without Inhibiting the Accumulation of Inorganic Carbon or the Associated Quenching of Chlorophyll *a* Fluorescence**—Anthony G. Miller* and David T. Canvin

1050 **Kinetic Properties of Phospho*enol*pyruvate Carboxylase in *Peperomia camptoricha***—Deborah L. Sipes and Irwin P. Ting*

1056 **Subunit Composition of Glutamine Synthetase Isozymes from Root Nodules of Bean (*Phaseolus vulgaris* L.)**—Xiaoyin Cai and Peter P. Wong*

1075 **Comparison of the Oxygen Exchange between Photosynthetic Cell Suspensions and Detached Leaves of *Euphorbia characias* L.**—Patrick Carrier, Pierre Chagvardieff, and Pierre Tapie*

1085 **Glycolate Metabolism in Low and High $CO_2$-Growth *Chlorella pyrenoidosa* and *Pavlova lutheri* as Determined by $^{18}O$-Labeling**—Edward J. de Veau* and John E. Burris

1152 **Role of Nitrate and Nitrite in the Induction of Nitrite Reductase in Leaves of Barley Seedlings**—Muhammad Aslam and Ray C. Huffaker*

1168 **Coregulation of Dihydrofolate Reductase and Thymidylate Synthase in Overproducer Cell Lines of Wild Carrot**—Gabor Lazar, Ildiko Toth, Letitia Haakonsen, and Howard M. Goodman*

1212 **Transformation of Soybean (*Glycine max*) by Infecting Germinating Seeds with *Agrobacterium tumefaciens***—Paula P. Chee*, Krystal A. Fober, and Jerry L. Slightom

1226 **Primary Site of Action of Amitrole in *Arabidopsis thaliana* Involves Inhibition of Root Elongation but Not of Histidine or Pigment Biosynthesis**—Dale R. Heim and Ignacio M. Larrinua*

1243 **Xenobiotic Monitoring in Plants by $^{19}F$ and $^{1}H$ Nuclear Magnetic Resonance Imaging and Spectroscopy. Uptake of Trifluoroacetic Acid in *Lycopersicon esculentum***—Andrew Rollins, Jill Barber*, Raymond Elliott, and Brian Wood

1251 **Role of Ethylene in the Geotropic Response of Bermudagrass (*Cynodon dactylon* L. Pers.) Stolons**—Pedro A. Balatti* and Jorge G. Willemöes

1275 **Characterization of a Polyphosphoinositide Phospholipase C from the Plasma Membrane of *Avena sativa***—Bonnie F. Tate*, G. Eric Schaller, Michael R. Sussman, and Richard C. Crain

1280 **An Enzymatic Conversion of Lipoxygenase Products by a Hydroperoxide Lyase in Blue-Green Algae (*Oscillatoria* sp.)**—Rivo-Hery Andrianarison, Jean-Louis Beneytout*, and Marie Tixier

1288 **Lysophosphatidate Acyltransferase Activities in the Microsomes from Palm Endosperm, Maize Scutellum, and Rapeseed Cotyledon of Maturing Seeds**—Khaik-Cheang Oo and Anthony H. C. Huang*

1303 **Properties of Solubilized Microsomal Lipase from Germinating *Brassica napus***—Randall J. Weselake, Lawrence W. Thomson, Don Tenaschuk, and Samuel L. MacKenzie*

1323 **Flavanone Glycoside Biosynthesis in *Citrus*. Chalcone Synthase, UDP-Glucose:Flavanone-7-*O*-Glucosyl-Transferase and -Rhamnosyl-Transferase Activities in Cell-Free Extracts**—Efraim Lewinsohn, Lothar Britsch, Yehuda Mazur, and Jonathan Gressel*

1356 **Inorganic Carbon Diffusion between $C_4$ Mesophyll and Bundle Sheath Cells. Direct Bundle Sheath $CO_2$ Assimilation in Intact Leaves in the Presence of an Inhibitor of the $C_4$ Pathway**—Colin L. D. Jenkins*, Robert T. Furbank, and Marshall D. Hatch

1364 **$CO_2$ Concentrating Mechanism of $C_4$ Photosynthesis. Permeability of Isolated Bundle Sheath Cells to Inorganic Carbon**—Robert T. Furbank, Colin L. D. Jenkins*, and Marshall D. Hatch

1372 **Mechanism of $C_4$ Photosynthesis. A Model Describing the Inorganic Carbon Pool in Bundle Sheath Cells**—Colin L. D. Jenkins*, Robert T. Furbank, and Marshall D. Hatch

1387 **Peroxisomal Degradation of Branched-Chain 2-Oxo Acids**—Heidrun Gerbling and Bernt Gerhardt*

1393 **Structural Similarities between Spinach Chloroplast and Cytosolic Class I Fructose 1,6-Bisphosphate Aldolases. Immunochemical and Amino-Terminal Amino Acid Sequence Analysis**—James J. Marsh, Kenneth J. Wilson, and Herbert G. Lebherz*

1414 **Proteolytic Activity at Alkaline pH in Oat Leaves, Isolation of an Aminopeptidase**—Leonardo M.

Casano, Marcelo Desimone, and Victorio S. Trippi*

1436 **Banana Ripening: Implications of Changes in Glycolytic Intermediate Concentrations, Glycolytic and Gluconeogenic Carbon Flux, and Fructose 2,6-Bisphosphate Concentration**—Randolph M. Beaudry*, Ray F. Severson, Clanton C. Black, and Stanley J. Kays

1445 **Purification and Characterization of Pectinmethylesterase from *Ficus awkeotsang* Makino Achenes**—Tsan-Piao Lin*, Chih-Chen Liu, Shun-Wen Chen, and Wei-Yang Wang

1476 **Intracellular Localization of Enzymes of Fatty Acid-β-Oxidation in the Alga *Cyanidium caldarium***—Wolfgang Gross

1481 **Novel Procedure for Extraction of a Latent Grape Polyphenoloxidase Using Temperature-Induced Phase Separation in Triton X-114**—Alvaro Sánchez-Ferrer, Roque Bru, and Francisco Garcia-Carmona*

1512 **Photosynthetic Carbon Metabolism in Photoautotrophic Cell Suspension Cultures Grown at Low and High $CO_2$**—Chrissl A. Roeske, Jack M. Widholm, and William L. Ogren*

1527 **Sucrose Phosphate Synthase and Acid Invertase as Determinants of Sucrose Concentration in Developing Muskmelon (*Cucumis melo* L.) Fruits**—Natalie L. Hubbard, Steven C. Huber, and D. Mason Pharr*

1551 **Anaerobic Carbon Metabolism by the Tricarboxylic Acid Cycle. Evidence for Partial Oxidative and Reductive Pathways during Dark Ammonium Assimilation**—Greg C. Vanlerberghe, Anne K. Horsey, Harold G. Weger, and David H. Turpin*

1562 **Limitation of $CO_2$ Assimilation and Regulation of Benson-Calvin Cycle Activity in Barley Leaves in Response to Changes in Irradiance, Photoinhibition, and Recovery**—Marie Djuardyn and Christine H. Foyer*

1569 **Purification and Interconversion of Homoserine Dehydrogenase from *Daucus carota* Cell Suspension Cultures**—Benjamin F. Matthews*, Margaret J. Farrar, and Ann C. Gray

1594 **Evidence for a Universal Pathway of Abscisic Acid Biosynthesis in Higher Plants from $^{18}O$ Incorporation Patterns**—Jan A. D. Zeevaart*, Timothy G. Heath, and Douglas A. Gage

1602 **Purification and Characterization of Lysine-Sensitive Aspartate Kinase from Maize Cell Cultures**—Stanton B. Dotson, David A. Somers, and Burle G. Gengenbach*

1613 **Detection of a Calcium-Activated Protein Kinase in *Mougeotia* by Using Synthetic Peptide Substrates**—Daniel M. Roberts

1620 **Light/Dark Modulation of Enzyme Activity in Developing Barley Leaves**—Marion H. Sibley and Louise E. Anderson*

## MOLECULAR BIOLOGY AND GENE REGULATION

73 **Auxin Levels Regulate the Expression of a Wound-Inducible Proteinase Inhibitor II-Chloramphenicol Acetyl Transferase Gene Fusion *in Vitro* and *in Vivo***—Andrea Kernan and Robert W. Thornburg*

124 **Cloning and Characterization of Root-Specific Barley Lectin**—David R. Lerner and Natasha V. Raikhel*

130 **Bacterial Chitinase Is Modified and Secreted in Transgenic Tobacco**—Peter Lund*, Rino Y. Lee, and Pamela Dunsmuir

157 **Effect of Ethylene Action Inhbitors upon Wound-Induced Gene Expression in Tomato Pericarp**—John M. Henstrand and Avtar K. Handa*

163 **Light Quality and Irradiance Level Interaction in the Control of Expression of Light-Harvesting Complex of Photosystem II. Pigments, Pigment-Proteins, and mRNA Accumulation**—Kenneth Eskins*, Peter Westhoff, and Phillip D. Beremand

253 **Control of α-Amylase Development in Cotyledons during and following Germination of Mung Bean Seeds**—Yukio Morohashi*, Hisashi Katoh, Yasuko Kaneko, and Hisashi Matsushima

304 **Tungstate, a Molybdate Analog Inactivating Nitrate Reductase, Deregulates the Expression of the Nitrate Reductase Structural Gene**—Mingde Deng, Thérèse Moureaux, and Michel Caboche*

440 **Genetic Transformation of Maize Cells by Particle Bombardment**—Theodore M. Klein*, Laura Kornstein, John C. Sanford, and Michael E. Fromm

451 **DNA Methylation Is Reduced in DNaseI-Sensitive Regions of Plant Chromatin**—Manfred Klaas and Richard M. Amasino

455 **Synthesis of Two Chromoplast-Specific Proteins during Fruit Development in *Capsicum annuum***—Lee A. Newman, Nouréddine Hadjeb, and Carl A. Price*

574 **Cross-Resistance to Short Residual Sulfonylurea Herbicides in Transgenic Tobacco Plants**—Jerome M. Gabard, Pierre J. Charest, V. N. Iyer, and Brian L. Miki*

617 **Seed Storage Protein Transcription and mRNA Levels in *Brassica napus* during Development and in Response to Exogenous Abscisic Acid**—Alice L. DeLisle* and Martha L. Crouch

636 **Molecular Characterization of the Major Maize Embryo Globulin Encoded by the *Glb1* Gene**—Faith C. Belanger and Alan L. Kriz*

648 **Relationship between Gene Dosage and Gene Expression in the Chloroplast of *Chlamydomonas reinhardtii***—Jonathan P. Hosler, Edwin A. Wurtz, Elizabeth H. Harris, Nicholas W. Gillham, and John E. Boynton*

694 **Transformation of *Brassica napus* and *Brassica oleracea* using *Agrobacterium tumefaciens* and the Expression of the *bar* and *neo* Genes in the Transgenic Plants**—Marc De Block*, Dirk De Brouwer, and Paul Tenning

702 **Developmentally Regulated Expression of the Gene Family for Cytosolic Glutamine Synthetase in *Pisum sativum***—Elsbeth L. Walker and Gloria M. Coruzzi*

829 **Characterization of a Radish Nuclear Gene Expressed during Late Seed Maturation**—Monique Raynal, Dominique Depigny, Richard Cooke, and Michel Delseny*

883 **Oxygen Inhibition of Nitrate Reductase Biosynthesis in Detached Corn Leaves via Inhibition of Total Soluble Protein Synthesis**—Juana D. Kenis and Wilbur H. Campbell*

1020 **Inheritance and Expression of the Mouse Metallothionein Gene in Tobacco. Impact on Cd Tolerance and Tissue Cd Distribution in Seedlings**—Indu B. Maiti, George J. Wagner*, Ricky Yeargan, and Arthur G. Hunt

1219 **Spatial and Temporal Influences on the Cell-Specific Distribution of Glycine Decarboxylase in Leaves of Wheat (*Triticum aestivum* L.) and Pea (*Pisum sativum* L.)**—Alyson K. Tobin*, Julian R. Thorpe, Christopher M. Hylton, and Stephen Rawsthorne

1270 **Transient Expression of Chimeric Genes Delivered into Pollen by Microprojectile Bombardment**—David Twell, Theodore M. Klein, Michael E. Fromm, and Sheila McCormick*

1520 **Heat-Stable Proteins and Abscisic Acid Action in Barley Aleurone Cells**—John V. Jacobsen* and Denis C. Shaw

1575 **Increased Gene Expression by the First Intron of Maize *Shrunken-1* Locus in Grass Species**—Vimla Vasil*, Maureen Clancy, Robert J. Ferl, Indra K. Vasil, and L. Curtis Hannah

## ENVIRONMENTAL AND STRESS PHYSIOLOGY

13 **Protoplast Volume:Water Potential Relationship and Bound Water Fraction in Spinach Leaves**—Mane Santakumari and Gerald A. Berkowitz*

39 **Alteration of the Physical and Chemical Structure of the Primary Cell Wall of Growth-Limited Plant Cells Adapted to Osmotic Stress**—Naim M. Iraki, Ray A. Bressan, P. M. Hasegawa, and Nicholas C. Carpita*

48 **Cell Walls of Tobacco Cells and Changes in Composition Associated with Reduced Growth upon Adaptation to Water and Saline Stress**—Naim M. Iraki, Narendra Singh, Ray A. Bressan, and Nicholas C. Carpita*

54 **Extracellular Polysaccharides and Proteins of Tobacco Cell Cultures and Changes in Composition Associated with Growth-Limiting Adaptation to Water and Saline Stress**—Naim M. Iraki, Ray A. Bressan, and Nicholas C. Carpita*

151 **Evidence for the Involvement of a Specific Cell Wall Layer in Regulation of Deep Supercooling of Xylem Parechyma**—Michael Wisniewski* and Glen Davis

175 **Phosphate Starvation Inducible Metabolism in *Lycopersicon esculentum*. III. Changes in Protein Secretion under Nutrient Stress**—Alan H. Goldstein*, Stephen P. Mayfield, Avihai Danon, and B. K. Tibbot

190 **A New Reversed Phase-HPLC Method Resolving All Major Higher Plant Photosynthetic Pigments**—Javier de las Rivas, Anunciación Abadía, and Javier Abadía*

233 **Analysis of Aluminum and Divalent Cation Binding to Wheat Root Plasma Membrane Proteins Using Terbium Phosphorescence**—Charles R. Caldwell

266 **Decreased Ethylene Biosynthesis, and Induction of Aerenchyma, by Nitrogen- or Phosphate-Starvation in Adventitious Roots of *Zea mays* L.**—Malcolm C. Drew*, Chuan-Jiu He, and Page W. Morgan

322 **Psychrometric Pressure-Volume Analysis of Osmoregulation in Roots, Shoots, and Whole Sporophytes of Salinized *Ceratopteris***—Robert M. Augé*, Leslie G. Hickok, and Ann J. W. Stodola

352 **Oxygen and Carbon Dioxide Fluxes from Barley Shoots Depend on Nitrate Assimilation**—Arnold J. Bloom*, Richard M. Caldwell, John Finazzo, Robert L. Warner, and Joseph Weissbart

357 **Enhanced Ethylene Emissions from Red and Norway Spruce Exposed to Acidic Mists**—Yi-Min Chen and Alan R. Wellburn*

379 **Light Adaptation/Acclimation of Photosynthesis and the Regulation of Ribulose-1,5-Bisphosphate Carboxylase Activity in Sun and Shade Plants**—Jeffrey R. Seemann

415 **Induction of α-Amylase Inhibitor Synthesis in Barley Embryos and Young Seedlings by Abscisic Acid and Dehydration Stress**—Masumi Robertson, M. Walker-Simmons, Doug Munro, and Robert D. Hill*

427 **Decline of Activity and Quantity of Ribulose Bisphosphate Carboxylase/Oxygenase and Net Photosynthesis in Ozone-Treated Potato Foliage**—Michael S. Dann and Eva J. Pell*

433 **Water Relations of Turgor Recovery and Restiffening of Wilted Cabbage Leaves in the Absence of Water Uptake**—P. Randall Weisz*, H. C. Randall, and T. R. Sinclair

493 **Salinity Effects on Photosynthesis in Isolated Mesophyll Cells of Cowpea Leaves**—Z. Plaut*, C. M. Grieve, and E. Federman

500 **Polyamines as Modulators of Salt Tolerance in Rice Cultivars**—R. Krishnamurthy and K. A. Bhagwat*

536 **Oxygen-18 Content of Atmospheric Oxygen Does Not Affect the Oxygen Isotope Relationship between Environmental Water and Cellulose in a Submerged Aquatic Plant, *Egeria densa* Planch**—Lee W. Cooper* and Michael J. DeNiro

542 **Light-Induced Spectral Absorbance Changes in Relation to Photosynthesis and the Epoxidation State of Xanthophyll Cycle Components in Cotton Leaves**—Wolfgang Bilger*, Olle Björkman, and Susan S. Thayer

552 **The Heat Shock Response of Carrot. Protein Variations between Cultured Cell Lines**—Cheol Ho Hwang and J. Lynn Zimmerman*

581 **Pyrroline-5-Carboxylate Reductase Is in Pea (*Pisum sativum* L.) Leaf Chloroplasts**—P. John Rayapati*, Cecil R. Stewart, and Ethan Hack

644 **Increased 8-Hydroxyguanine Content of Chloroplast DNA from Ozone-Treated Plants**—Robert A. Floyd*, Melinda S. West, William E. Hogsett, and David T. Tingey

685 **Mutants of *Arabidopsis thaliana* with Decreased Amplitude in Their Phototropic Response**—Jitendra

P. Khurana, Zhangling Ren, Benjamin Steinitz, Brian Parks, Thérèse R. Best, and Kenneth L. Poff*

719 **Axial and Radial Hydraulic Resistance to Roots of Maize (*Zea mays* L.)**—Jürgen Frensch* and Ernst Steudle

733 **Kinetin Enhanced 1-Aminocycloproprane-1-Carboxylic Acid Utilization during Alleviation of High Temperatures Stress in Lettuce Seeds**—Anwar A. Khan* and Janusz Prusinski

766 **Osmotic Pressure of Aqueous Polyethylene Glycols. Relationship between Molecular Weight and Vapor Pressure Deficit**—Nicholas P. Money

770 **Functional Analysis of the Photosynthetic Apparatus of *Prochlorothrix hollandica* (Prochlorales), a Chlorophyll *b* Containing Procaryote**—Tineke Burger-Wiersma* and Anton F. Post

780 **Relationships between Cadmium, Zinc, Cd-Peptide, and Organic Acid in Tobacco Suspension Cells**—Rachel M. Krotz, Bill P. Evangelou, and George J. Wagner*

788 **Selection and Characterization of *Dunaliella salina* Mutants Defective in Haloadaptation**—Edith Chitlaru and Uri Pick*

837 **Hypoxic Induction of Anoxia Tolerance in Root Tips of *Zea mays***—James Johnson, B. Greg Cobb, and Malcolm C. Drew*

855 **Stable NaCl Tolerance of Tobacco Cells Is Associated with Enhanced Accumulation of Osmotin**—P. Christopher LaRosa*, Narendra K. Singh, Paul M. Hasegawa, and Ray A. Bressan

862 **Water Deficits and Reproduction in Maize. Response of the Reproductive Tissue to Water Deficits at Anthesis and Mid-Grain Fill**—Mark E. Westgate* and D. Thomson Grant

917 **Pyrroline-5-Carboxylate Reductase in *Chlorella autotrophica* and *Chlorella saccharophila* in Relation to Osmoregulation**—Gilles Laliberté* and Johan A. Hellebust

924 **Effect of Growth Temperature on the Biosynthesis of Chloroplastic Galactosyldiacylglycerol Molecular Species in *Brassica napus* Leaves**—Geoff Johnson and John P. Williams*

930 **Effects of Cold-Treatment on Protein Synthesis and mRNA Levels in Rice Leaves**—Matthias Hahn* and Virginia Walbot

961 **Parallel Effects of Freezing and Osmotic Stress on the ATPase Activity and Protein Composition of the Plasma Membrane of Winter Rye Seedlings**—Matsuo Uemura and Peter L. Steponkus*

970 **Low $CO_2$ Prevents Nitrate Reduction in Leaves**—Werner M. Kaiser* and Jutta Förster

975 **Effect of Water Deficits on Seed Development in Soybean. I. Tissue Water Status**—Mark E. Westgate* and D. Thomson Grant

980 **Effect of Water Deficits on Seed Development in Soybean. II. Conservation of Seed Growth Rate**—Mark E. Westgate*, J. R. Schussler, D. C. Reicosky, and M. L. Brenner

999 **Change in Photosynthetic Capacity over the Cell Cycle in Light/Dark-Synchronized *Amphidinium carteri* Is Due Solely to the Photocycle**—Mark W. Gerath and Sallie W. Chisholm*

1040 **Mode of Action of the Massively Accumulated β-Carotene of *Dunaliella bardawil* in Protecting the Alga against Damage by Excess Irradiation**—Ami Ben-Amotz, Aviv Shaish, and Mordhay Avron*

1063 **Metabolic Acclimation to Hypoxia in Winter Cereals. Low Temperature Flooding Increases Adenylates and Survival in Ice Encasement**—Christopher J. Andrews* and M. Keith Pomeroy

1069 **The Nature of Light-Induced Inhibition of Photosystem II in Pumpkin (*Cucurbita pepo* L.) Leaves Depends on Temperature**—Esa Tyystjärvi*, Jari Ovaska, Pirjo Karunen, and Eva-Mari Aro

1094 **Kinetics of Aluminum Uptake by Excised Roots of Aluminum-Tolerant and Aluminum-Sensitive Cultivars of *Triticum aestivum* L.**—Guichang Zhang* and Gregory J. Taylor

1112 **Development of Two Isogenic Sweet Corn Hybrids Differing for Glycinebetaine Content**—David Rhodes*, Patrick J. Rich, Dennis G. Brunk, Grace C. Ju, Judith C. Rhodes, Michael H. Pauly, and Leon A. Hansen

1122 **Genotypic Variation for Glycinebetaine among Public Inbreds of Maize**—Dennis G. Brunk, Patrick J. Rich, and David Rhodes*

1131 **Effect of Cold Acclimation on the Incidence of Two Forms of Freezing Injury in Protoplasts Isolated from Rye Leaves**—Matsuo Uemura and Peter L. Steponkus*

1162 **Heliotropic Leaf Movements in Common Beans Controlled by Air Temperature**—Qingnong A. Fu* and James R. Ehleringer

1174 **Increased Tolerance to Photoinhibitory Light in Paraquat-Resistant *Conyza bonariensis* Measured by Photoacoustic Spectroscopy and $^{14}CO_2$-Fixation**—Marcel A. K. Jansen, Yoseph Shaaltiel, Dror Kazzes, Ora Canaani, Shmuel Malkin, and Jonathan Gressel*

1188 **Mechanisms of Aluminum Tolerance in Wheat. An Investigation of Genotypic Differences in Rhizosphere pH, $K^+$, and $H^+$ Transport, and Root-Cell Membrane Potentials**—Susan C. Miyasaka, Leon V. Kochian*, Jon E. Shaff, and Charles D. Foy

1197 **Polyamines in Rice Seedlings under Oxygen-Deficit Stress**—Remo Reggiani*, Alejandro Hochkoeppler, and Alcide Bertani

1262 **Effects of Sodium Chloride on the Hydraulic Conductivity of Soybean Root Systems**—Robert J. Joly

1308 **Low Growth Temperature-Induced Increase in Light Saturated Photosystem I Electron Transport Is Cation Dependent**—Norman P. A. Huner* and Tracey L. Reynolds

1345 **Cyclic Variations in Nitrogen Uptake Rate of Soybean Plants. Ammonium as a Nitrogen Source**—Leslie Tolley Henry* and C. David Raper, Jr.

1407 **Competitive $Al^{3+}$ Inhibition of Net $Mg^{2+}$ Uptake by Intact *Lolium multiflorum* Roots. I. Kinetics**—Zdenko Rengel* and Donald L. Robinson

1432 **Stress-Induced Accumulation of Wheat Germ Agglutinin and Abscisic Acid in Roots of Wheat Seed-**

lings—Bruno P. A. Cammue*, Willem F. Broekaert, Jan T. C. Kellens, Natasha V. Raikhel, and Willy J. Peumans

1454 **Negative Pressures Produced in an Artificial Osmotic Cell by Extracellular Freezing**—Jian Jun Zhu, Ernst Steudle*, and Erwin Beck

1460 **Increased Potassium Absorption Confers Resistance to Group IA Cations in Rubidium-Selected Suspension Cells of *Brassica napus***—Daniel D. Lefebvre

1471 **Sensitivity of Altitudinal Ecotypes of the Wild Tomato *Lycopersicon hirsutum* to Chilling Injury**—John K. Raison* and Murray A. Brown

1494 **Low and High Temperature Limits to PSII. A Survey Using *trans*-Parinaric Acid, Delayed Light Emission, and $F_o$ Chlorophyll Fluorescence**—William B. Terzaghi*, David C. Fork, Joseph A. Berry, and Christopher B. Field

1501 **Effects of Ambient and Acute Partial Pressures of Ozone on Leaf Net $CO_2$ Assimilation of Field-Grown *Vitis vinifera* L.**—Teryl R. Roper and Larry E. Williams*

1558 **Growth and Development Temperature Influences Level of Tolerance to High Light Stress**—Kenneth L. Steffen and Jiwan P. Palta*

1580 **Combined Low Temperature-High Light Effects on Gas Exchange Properties of Jojoba Leaves**—Francesco Loreto* and Guido Bongi

1625 **Water Transport in the Liana *Bauhinia fassoglensis* (Fabaceae)**—Frank W. Ewers*, Jack B. Fisher, and Shau-Ting Chiu

## DEVELOPMENT AND GROWTH REGULATION

1 **Enzymes of Ethylene Biosynthesis**—Hans Kende

5 **Rapid Effects of Red Light on the Isopentenyladenosine Content in Scots Pine Seeds**—Mohammed Qamaruddin* and Elisabeth Tillberg

9 **Hydrolysis of Indole-3-Acetic Acid Estes Exposed to Mild Alkaline Conditions**—Bruce G. Baldi*, Barbara R. Maher, and Jerry D. Cohen

19 **Gibberellic Acid Effects on Greening in Pea Seedlings**—James N. Mathis*, James A. Bradburne, and Melissa A. Dupree

85 **Whole Plant Senescence of Sunflower following Seedhead Removal**—InSun Ho and Frederick E. Below*

101 **Regulation of Embryo Dormancy by Manipulation of Abscisic Acid in Kernels and Associated Cob Tissue of *Zea mays* L. Cultured *in Vitro***—David J. Hole*, J. D. Smith, and B. Greg Cobb

144 **Hybrid Hybridoma Cell Lines Which Express Anti-Zeatin Riboside, Anti-Abscisic Acid, and Hybrid Antibodies**—Gary M. Banowetz

183 **Polyamine Metabolism of Potato Seed-Tubers during Long-Term Storage and Early Sprout Development**—Loretta J. Mikitzel and N. Richard Knowles*

259 **Sucrose Loading in Isolated Veins of *Pisum sativum*: Regulation by Abscisic Acid, Gibberellic Acid, and Cell Turgor**—Juan José Estruch, Juli G. Peretó, Yolanda Vercher, and José Pio Beltrán*

291 **Carbon Partitioning among Leaves, Fruits, and Seeds during Development of *Phaseolus vulgaris* L.**—Donald R. Geiger*, Wen-Jang Shieh, and Rose M. Saluke

310 **Inhibitory Action of Auxin on Root Elongation Not Mediated by Ethylene**—Lennart Eliasson*, Gertrud Bertell, and Eva Bolander

338 **Distribution of Endogenous Indole-3-Acetic Acid and Compression Wood Formation in Reoriented Branches of Douglas-Fir**—Brayton F. Wilson*, Ching-Te Chien, and Joe B. Zaerr

362 **Gibberellins in Embryo-Suspensor of *Phaseolus coccineus* Seeds at the Heart Stage of Embryo Development**—Albert Piaggesi, Piero Picciarelli, Roberto Lorenzi, and Amedeo Alpi*

464 **Timing of Growth Inhibition following Shoot Inversion in *Pharbitis nil***—A. M. Abdel-Rahman and Morris G. Cline*

466 **Effect of Asymmetric Auxin Application on *Helianthus* Hypocotyl Curvature**—Fernando Migliaccio and David L. Rayle*

484 **Auxins Induce $\alpha$-Amylase Activity in Pea Cotyledons**—Eiji Hirasawa

610 **The Occurrence of a $Ca^{2+}$-Dependent Period in the Red Light-Induced Late G1 Phase of Germinating *Adiantum* Spores**—Moritoshi Iino*, Masami Endo, and Masamitsu Wada

624 **Artefactual Origins of Cyclic AMP in Higher Plant Tissues**—Anne Spiteri, Odile M. Viratelle, Philippe Raymond*, Michel Rancillac, Julie Labouesse, and Alain Pradet

669 **Ethylene-Like Activity of Isocyanides**—Jeanette M. Quinn* and Shang Fa Yang

738 **Polyamine Binding to Proteins in Oat and *Petunia* Protoplasts**—Yosef Mizrahi, Philip B. Applewhite, and Arthur W. Galston*

744 **Localization and Pattern of Graviresponse across the Pulvinus of Barley *Hordeum vulgare***—Thomas G. Brock*, Casey R. Lu, Najati S. Ghosheh, and Peter B. Kaufman

775 **Free and Conjugated Indole-3-Acetic Acid in Developing Bean Seeds**—Krystyna Bialek and Jerry D. Cohen*

800 **Reflected Far-Red Light Effects on Chlorophyll and Light-Harvesting Chlorophyll Protein (LHC-II) Contents under Field Conditions**—James A. Bradburne, Michael J. Kasperbauer*, and James N. Mathis

804 **Auxin Physiology of the Tomato Mutant *diageotropica***—Steven G. Daniel, David L. Rayle*, and Robert E. Cleland

808 **Cytokinin-to-Auxin Ratios and Morphology of Shoots and Tissues Transformed by a Chimeric Isopentenyl Transferase Gene**—Ann C. Smigocki* and Lowell D. Owens

823 **Competition for *in Vitro* [$^3$H]Gibberellin $A_4$ Binding in Cucumber by Substituted Phthalimides. Comparison with *in Vivo* Gibberellin-Like Activity**—Nasser Yalpani, Jeffrey C. Suttle*, Julie F. Hultstrand, and Shirley J. Rodaway

876 **Culm Strength of Barley. Correlation among Maximum Bending Stress, Cell Wall Dimensions, and Cellulose Content**—Akira Kokubo, Susumu Kuraishi*, and Naoki Sakurai

986 **Roles of Carbohydrate Supply and Phytohormones in Maize Kernel Abortion**—Andrew J. Reed* and George W. Singletary

1080 **Characterization and Rooting Ability of Indole-3-Butyric Acid Conjugates Formed during Rooting of Mung Bean Cuttings**—Zeev Wiesman, Joseph Riov*, and Ephraim Epstein

1126 **Activity of Ageing Carnation Flower Parts and the Effects of 1-(Malonylamino)cyclopropane-1-Carboxylic Acid-Induced Ethylene**—Kathleen M. Hanley*, Shimon Meir, and William J. Bramlage

1157 **Light Regulation of β-Tubulin Gene Expression during Internode Development in Soybean (*Glycine max* [L.] Merr.)**—Mauricio M. Bustos, Mark J. Guiltinan, Richard J. Cy, David Ahdoot, and Donald E. Fosket*

1232 **Increased Proteolysis of Senescing Rice Leaves in the Presence of NaCl and KCl**—Seong-Mo Kang and John S. Titus*

1247 **Springback in Root Gravitropism**—A. Carl Leopold* and Scott H. Wettlaufer

1255 **Further Identification of Endogenous Gibberellins in the Shoots of Pea, Line G2**—Anna Halinska, Peter J. Davies*, James W. Lee, and Yu-Xian Zhu

1266 **Phosphoinositides in Barley Aleurone Layers and Gibberellic Acid-Induced Changes in Metabolism**—Pushpalatha P. N. Murthy*, Jill M. Renders, and Lisa M. Keranen

1329 **Gravitropism in Higher Plant Shoots. VI. Changing Sensitivity to Auxin in Gravistimulated Soybean Hypocotyls**—Patricia A. Rorabaugh and Frank B. Salisbury*

1351 **Abscisic Acid Levels during Early Seed Development in *Sechium edule* Sw.**—Paolo Vernieri*, Pierdomenico Perata, Roberto Lorenzi, and Nello Ceccarelli

1467 **Abscisic Acid ELISA: Organic Acid Interference**—Helen Belefant and Franklin Fong*

1586 **A Novel Effect in *Phycomyces* Phototropism. Positive Bending and Compensation Spectrum in Far UV**—Teodor Popescu, Andreas Roessler, and Leonid Fukshansky*

1609 **Hormonal Regulation and Distribution of Peroxidase Isoenzymes in the Cucurbitaceae**—Fred B. Abeles*, Charles L. Biles, and Linda J. Dunn

**CELLULAR AND STRUCTURAL BIOLOGY**

31 **New Ways to Look at the Architecture of Plant Cell Walls. Localization of Polygalacturonate Blocks in Plant Tissues**—Joseph E. Varner* and Rosannah Taylor

217 **Immunocytochemical Localization of ADPglucose Pyrophosphorylase in Developing Potato Tuber Cells**—Taek Woo Kim, Vincent R. Franceschi, Thomas W. Okita*, Nina L. Robinson, Matthew Morrell, and Jack Preiss

242 **Enzymic Analysis of Feruloylated Arabinoxylans (Feraxan) Derived from *Zea mays* Cell Walls. II. Fractionation and Partial Characterization of Feraxan Fragments Dissociated by a *Bacillus subtillis* Enzyme (Feraxanase)**—Kazuhiko Nishitani and Donald J. Nevins

473 **Production of an Antibody Specific for the Propeptide of Wheat Germ Agglutinin**—James J. Smith and Natasha V. Raikhel*

674 **Coated Vesicles Are Involved in the Transport of Storage Proteins during Seed Development in *Pisum sativum* L.**—Suzanne M. Harley and Leonard Beevers*

816 **Tomato Fruit Cell Wall. I. Use of Purified Tomato Polygalacturonase and Pectinmethylesterase to Identify Developmental Changes in Pectins**—James L. Koch and Donald J. Nevins*

1006 **An Abundant, Highly Conserved Tonoplast Protein in Seeds**—Kenneth D. Johnson*, Eliot M. Herman, and Maarten J. Chrispeels

1025 **Effects of 3-(3,4-Dichlorophenyl)-1,1-Dimethylurea on the Cell Cycle in *Euglena gracilis***—Muh-ching Yee and James C. Bartholomew*

1143 **Effects of Polyploidy on Photosynthetic Rates, Photosynthetic Enzymes, Contents of DNA, Chlorophyll, and Sizes and Numbers of Photosynthetic Cells in the $C_4$ Dicot *Atriplex confertifolia***—Donn A. Warner and Gerald E. Edwards*

1259 **Antibodies against the Calcium-Binding Protein. Calsequestrin from *Streptanthus tortuosus* (Brassicaceae)**—Mei Chou, Karl-Heinz Krause, Kevin P. Campbell, Kenneth G. Jensen, and Richard D. Sjolund*

1382 ***In Vivo* Biosynthetic Studies of the *Dolichos biflorus* Seed Lectin**—Jeanette M. Quinn and Marilynn E. Etzler*

1419 **Monoclonal Antibodies against Pectin. Recognition of a Conformation Induced by Calcium**—Françoise Liners, Jean-Jacques Letesson, Christian Didembourg, and Pierre Van Cutsem*

1425 **Isolation and Characterization of Protein Bodies in *Lupinus angustifolius***—Kenwyn R. Gayler*, Friederika Wachsmann, Sotirios Kolivas, Roslyn Nott, and Elizabeth D. Johnson

1543 **Leaf Anatomy of $C_3$-$C_4$ Species as Related to Evolution of $C_4$ Photosynthesis**—R. Harold Brown* and Paul W. Hattersley

**MICROBE-PLANT INTERACTIONS**

23 **Abscisic Acid Suppression of Phenylalanine Ammonia-Lyase Activity and mRNA, and Resistance of Soybeans to *Phytophthora megasperma* f.sp. *glycinea***—Edmund W. B. Ward*, David M. Cahill, and Madan K. Bhattacharyya

113 **Variation in Binding and Virulence of *Agrobacterium tumefaciens* Chromosomal Virulence (*chv*) Mutant Bacteria on Different Plant Species**—Martha C. Hawes* and Steven G. Pueppke

119 **Immunogold Localization of the Citrus Exocortis Viroid-Induced Pathogenesis-Related Proteinase P69**

**in Tomato Leaves**—Pablo Vera, José Hernández-Yago, and Vicente Conejero*

227 **Root Respiration and Growth in *Plantago major* as Affected by Vesicular-Arbuscular Mycorrhizal Infection**—Rob Baas*, Adrie van der Werf, and Hans Lambers

298 **Role of the Plasmalemma $H^+$-ATPase in *Pseudomonas syringae*-Induced $K^+/H^+$ Exchange in Suspension-Cultured Tobacco Cells**—Merelee M. Atkinson* and C. Jacyn Baker

315 **Effects of Gradual Increases in $O_2$ Concentration on Nodule Activity in Soybean**—Stephen Hunt*, Bryan J. King, and David B. Layzell

598 **Measurement of the Fractional Oxygenation of Leghemoglobin in Intact Detached Pea Nodules by Reflectance Spectroscopy**—Jonathan D. Monroe, Thomas G. Owens, and Thomas A. LaRue*

603 **Effects of Carbohydrate on the Internal Oxygen Concentration, Oxygen Uptake, and Nitrogenase Activity in Detached Pea Nodules**—Jonathan D. Monroe and Thomas A. LaRue*

690 **Nodule Formation Is Stimulated by the Ethylene Inhibitor Aminoethyoxyvinylglycine**—N. Kent Peters* and Deborah K. Crist-Estes

842 **A Chalcone and Two Related Flavonoids Released from Alfalfa Roots Induce *nod* Genes of *Rhizobium meliloti***—Carl A. Maxwell, Ueli A. Hartwig, Cecillia M. Joseph, and Donald A. Phillips*

889 **Elicitation of Lignin Biosynthesis and Isoperoxidase Activity by Pectic Fragments in Suspension Cultures of Castor Bean**—Robert J. Bruce* and Charles A. West

898 **Nitrogen Assimilating Enzyme Activities and Enzyme Protein during Development and Senescence of Effective and Plant Gene-Controlled Ineffective Alfalfa Nodules**—Margaret A. Egli*, Stephen M. Griffith, Susan S. Miller, Michael P. Anderson, and Carroll P. Vance

911 **Increase of Chalcone Synthase mRNA in Pathogen-Inoculated Soybeans with Race-Specific Resistance Is Different in Leaves and Roots**—Shree Dhawale, Ginette Souciet, and David N. Kuhn*

1138 **Interactions among Flavonoid *nod* Gene Inducers Released from Alfalfa Seeds and Roots**—Ueli A. Hartwig, Carl A. Maxwell, Cecillia M. Joseph, and Donald A. Phillips*

**MEMBRANES AND BIOENERGETICS**

34 **Purification of an $H^+$-Translocating Inorganic Pyrophosphatase from Vacuole Membranes of Red Beet**—Vahé Sarafian* and Ronald J. Poole

62 **Light-Induced Polar pH Changes in Leaves of *Elodea canadensis*. I. Effects of Carbon Concentration and Light Intensity**—J. Theo M. Elzenga* and Hidde B. A. Prins

68 **Light-Induced Polar pH Changes in Leaves of *Elodea canadensis*. II. Effects of Ferricyanide: Evidence for Modulation by the Redox State of the Cytoplasm**—J. Theo M. Elzenga* and Hidde B. A. Prins

91 **Sequential Events in the Photoinhibition of *Synechocystis* under Sodium Stress**—Jindong Zhao and Jerry J. Brand*

203 **Manipulating Membrane Fatty Acid Compositions of Whole Plants with Tween-Fatty Acid Esters**—William B. Terzaghi

213 **Calcium Activates an Electrogenic Proton Pump in *Neurospora* Plasma Membrane**—Roger R. Lew

249 **Direct Measurement of $K^+$ Channels in Thylakoid Membranes by Incorporation of Vesicles into Planar Lipid Bilayers**—Mark Tester* and Michael R. Blatt

272 **Isolation and Partial Characterization of the Glutamate/Aspartate Transporter from Pea Leaf Mitochondria Using a Specific Monoclonal Antibody**—Jeevalatha Vivekananda and David J. Oliver*

287 **Absence of a Formate-Induced Release of Bicarbonate from Photosystem II**—Alan Stemler

387 **Selective and Reversible Inhibition of Active $CO_2$ Transport by Hydrogen Sulfide in a Cyanobacterium**—George S. Espie*, Anthony G. Miller, and David T. Canvin

401 **Enhanced Thermal Tolerance in a Mutant of *Arabidopsis* Deficient in Palmitic Acid Unsaturation**—Ljerka Kunst, John Browse, and Chris Somerville*

409 **Formation of the Photosynthetic Electron Transport System during the Early Phase of Greening in Barley Leaves**—Kazuko Ohashi*, Ayumi Tanaka, and Hideo Tsuji

445 **Maize Photosystem I. Identification of the Subunit which Binds Plastocyanin**—R. Max Wynn, Christine Luong, and Richard Malkin*

487 **Role of Nonhomicity in the Regulation of Electron Transport in Plant Mitochondria**—David G. Whitehouse, Anne Catherine Fricaud, and Anthony L. Moore*

526 **Reconstitution of Oxidative Phosphorylation and of Oligomycin-Sensitive ATPase by Five- and Six-Subunit Forms of Pea Mitochondrial $F_1$-ATPase**—Arnost Horak*, Mary Packer, and Helena Horak

530 **Oxidation of Proline and Glutamate by Mitochondria of the Inflorescence of Voodoo Lily (*Sauromatum guttatum*)**—Hanna Skubatz*, Bastiaan J. D. Meeuse, and Arnold J. Bendich

567 **Phospholipid-Dependence of Plant UDP-Glucose Sterol $\beta$-D-Glucosyl Transferase. IV. Reconstitution into Small Unilamellar Vesicles**—Alain Ury, Pierre Benveniste, and Pierrette Bouvier-Navé*

629 **Distribution of Thylakoid Proteins betwen Stromal and Granal Lamellae in Spirodela. Dual Location of Photosystem II Components**—Franklin E. Callahan, William P. Wergin, Nathan Nelson, Marvin Edelman, and Autar K. Mattoo*

727 **A New Form of Chlorophyll *c* Involved in Light-Harvesting**—Marvin W. Fawley

756 **Diclofop-Methyl Increases the Proton Permeability of Isolated Oat-Root Tonoplast**—Denise Marie Ratterman* and Nelson E. Balke

795 **Sensory Transduction and Electrical Signaling in Guard Cells**—Elba E. Serrano* and Eduardo Zeiger

1014 **Purification and Identification of a Plasma Membrane Associated Electron Transport Protein from Maize (*Zea mays* L.) Roots**—Douglas G. Luster and Thomas J. Buckhout*

1100 **Kinetics of Chlorophyll Accumulation and Formation of Chlorophyll-Protein Complexes during Greening of *Chlamydomonas reinhardtii y*-1 at 38°C**—Margaret A. Maloney, J. Kenneth Hoober*, and Dawn B. Marks

1107 **Characteristics of the $Mg^{2+}$-ATPase Activity Associated with the Membrane-Bound Maize Coupling Factor**—William S. Cohen

1179 **Stoichiometry of Photosystem I, Photosystem II, and Phycobilisomes in the Red Alga *Porphyridium cruenteum* as a Function of Growth Irradiance**—Francis X. Cunningham, Jr., Ronald J. Dennenberg, László Mustárdy, Paul A. Jursinic, and Elisabeth Gantt*

1202 **High Affinity $K^+$ Uptake in Maize Roots. A Lack of Coupling with $H^+$ Efflux**—Leon V. Kochian*, Jon E. Shaff, and William J. Lucas

1239 **$Ca^{2+}$-Selective Microelectrodes and Their Application to Plant Cells and Tissues**—Hubert Felle

1296 **Effects of *Helminthosporium maydis* Race T Toxin on Electron Transport in Susceptible Corn Mitochondria and Prevention of Toxin Actions by Dicyclohexylcarbodiimide**—Marcia J. Holden* and Heven Sze

1317 **Carrier-Mediated Uptake of 1-(Malonylamino)-cyclopropane-1-Carboxylic Acid in Vacuoles Isolated from *Catharanthus roseus* Cells**—Mondher Bouzayen, Alain Latché, Jean-Claude Pech*, and Gérard Marigo

1339 **Temperature-Induced Protein Conformational Changes in Barley Root Plasma Membrane-Enriched Microsomes. III. Effect of Temperature and Cations on Protein Sulfhydryl Reactivity**—Charles R. Caldwell

1402 **Properties of Proteoliposomes Containing Fusicoccin Receptors from Maize**—Patrizia Aducci, Maria Rosaria Fullone, and Alessandro Ballio*

1507 **Phosphate Translocator of Mesophyll and Bundle Sheath Chloroplasts of a $C_4$ Plant, *Panicum miliaceum* L. Identification and Kinetic Characterization**—Jun-ichi Ohnishi*, Ulf Ingo Flügge, and Hans W. Heldt

1535 **Subunit Composition of Cytochrome *c* Oxidase in Mitochondria of *Zea mays***—Malcolm J. Hawkesford, Andrew D. Liddell, and Christopher J. Leaver*

**NATURAL PRODUCTS**

1488 **Isolation of Gibberellin Precursors from Heavily Pigmented Tissues**—James D. Metzger* and Jan P. Hazebroek

Plant Physiol. (1989) 91, xxviii–xxxi

# Subject Index

**A**

Abscisic acid
  dehydration stress and, α-amylase inhibitor synthesis, barley embryos, 415
  ELISA, organic acid interference, 1467
  heat-stable proteins, barley aleurone cells, 1520
  hybrid hybridoma cell lines, hybrid antibodies, 144
  levels during early seed development, *Schium edule*, 1351
  manipulation in kernels and corn cob tissues, regulation of embryo dormancy, 101
  seed storage protein transcription, mRNA levels, rapeseed, 617
  stress-induced accumulation, wheat seedling, 1432
  sucrose loading, isolated veins, pea, 259
  suppression of phenylalanine ammonia-lyase activity, soybean, 23
  universal pathway of biosynthesis, $^{18}O$ incorporation patterns, cocklebur and tobacco, 1594
Achenes, *Ficus awkeotsang*, characterization, pectinmethylesterase, 1445
Acid invertase, sucrose phosphate synthase and, muskmelon, 1527
Adenosine monophosphate, cyclic, artefactual origins, higher plant tissues, 624
Adenosine triphosphatase
  oligomycin-sensitivity conferring protein, 526
  protein composition and, freezing and osmotic stress, winter rye seedlings, 961
Adenosine triphosphate
  characteristics of $Mg^{2+}$-ATPase activity, membrane-bound maize coupling factor, 1107
  polycation-stimulated protein kinase, purified oat phytochrome, 709
  role of nonohmicity, electron transport, plant mitochondria, 487
  stromal phosphate concentration, feedback limited photosynthesis, bean, 679
*S*-Adenosyl-L-methionine, inactivation of 1-aminocyclopropane-1-carboxylate synthase, L-vinylglycine, tomato, 1036
*S*-Adenosyl-L-methionine:6a-hydroxymaackiain 3-*O*-methyltransferase, purification and characterization, pea, 559
Adenylates, metabolic acclimation in winter cereals, 1063
*Adiantum*, germinating spores, red light-induced late G1 phase, $Ca^{2+}$-dependent period, 610
ADPglucose pyrophosphorylase, immunocytochemical localization, developing potato tuber cells, 217
Aerenchyma, decreased ethylene biosynthesis, adventitious roots, corn, 266
Agglutinin
  wheat germ
    production of antibody, propeptide specificity, 473
    stress-induced accumulation, wheat seedling, 1432
*Agrobacterium tumefaciens*
  binding and virulence of *chv* mutants, different plant species, 113
  transformation of rapeseed and cauliflower, *bar* and *neo* genes, transgenic plants, 694
  transformation of soybean seed, 1212
Aleurone layers
  barley
    heat-stable proteins, abscisic acid action, 1520
    gibberellic acid-induced changes in metabolism, phosphoinositides, 1266
Alfalfa
  nodule formation, aminoethoxyvinylglycine, 690
  nodules, development, nitrogen assimilating enzyme activities, 898
  root, induction of rhizobial *nod* genes, flavonoids, 842
  seed and roots, interactions, flavonoid *nod* gene inducers, 1138
Algae
  *Anacystis nidulans*, nitrogen-induced changes, net $O_2$ exchange, 28
  *Cyanidium caldarium*, enzymes, fatty acid-β-oxidation, 1476
  *Dunaliella bardawil*, mode of action, β-carotene, 1040
  *Dunaliella salina*, haloadapation defective mutants, characterization, 786
  *Euglena gracilis*, 3-(3,4-dichlorophenyl)-1, 1-dimethylurea, cell cycle, 1025
  light-harvesting, new form of chlorophyll *c*, 727
  *Oscillatoria*
    enzymatic conversion, lipoxygenase products, 1280
    properties of lipoxygenase, 367
  *Porphyridium cruentum*, photosystems I and II, phycobilisomes, 1179
  Rubisco divergence, 939
  *Selenastrum minutum*
    anaerobic carbon metabolism, tricarboxylic acid cycle, 1551
    chlorophyll *a* fluorescence, total photosynthetic electron flow, 331
    short-term metabolite changes, transient ammonium assimilation, 749
Allele
  isogenic maize hybrids, glycinebetaine content differences, 1112
  molecular characterization of *Glb1* gene, major maize embryo globulin, 636
*Alocasia macrorrhiza*, light adaptation/acclimation of photosynthesis, ribulose-1, 5-bisphosphate carboxylase regulation, 379
Altitude, sensitivity of wild tomato, chilling injury, 1471
Aluminum
  competitive inhibition, net magnesium uptake, *Lolium multiflorum* roots, 1407
  divalent cation binding, wheat root plasma membrane proteins, 233
  kinetics of uptake in wheat, 1094
  tolerance, mechanisms of, wheat, 1188
Amino acids, polyamine metabolism in potato seed-tubers, long-term storage, early sprout development, 183
1-Aminocyclopropane-1-carboxylate synthase, inactivation of L-vinylglycine, *S*-adenosyl-L-methionine, tomato, 1036
1-Aminocyclopropane-1-carboxylic acid, kinetin-enhanced utilization, high temperature stress, lettuce seeds, 733
Aminoethoxyvinylglycine, nodule formation in alfalfa, 690
Aminopeptidase, proteolytic activity at alkaline pH, oat leaves, 1414
Amitrole, primary site of action, *Arabidopsis thaliana*, 1226
Ammonium
  transient assimilation, short-term metabolite changes, *Selenastrum minutum*, 749
  tricarboxylic acid cycle, anaerobic carbon metabolism, *Selenastrum minutum*, 1551
*Amphidinium carteri*, light/dark-synchronized, cell cycle *vs.* photocycle control, photosynthesis, 999
α-Amylase
  control of development, cotyledons, mung bean seeds, 253
  induction of activity by auxin, pea cotyledons, 484
  induction of inhibitor synthesis, abscisic acid stress and dehydration, barley embryos, 415
*Anacystis nidulans*, changes in net $O_2$ exchange, inorganic nitrogen, 28
Anoxia, tolerance, hypoxic induction, corn root tips, 837
*Arabidopsis thaliana*
  mutant deficient in palmitic acid unsaturation, enhanced thermal tolerance, 401
  mutants, decreased amplitude, phototropic response, 685
  primary site of amitrole action, 1226
Arabinoxylans, feruloylated, enzymic analysis, corn cell wall, 242
Arginine, metabolism in developing soybean cotyledons, 170
Aspartate, -glutamate transporter, pea leaf mitochondria, 272
Aspartate kinase, lysine-sensitive, maize cell cultures, 1602
Assays
  ELISA, abscisic acid, organic acid interference, 1467
  HPLC, photosynthetic pigment analysis, 190
  isolation of gibberellin precursors, heavily pigmented tissues, pennycress, 1488
  novel procedure for extraction, latent polyphenoloxidase, grape, 1481
  production of antibody, propeptide of wheat germ agglutinin, 473
  reflectance spectroscopy, fractional oxy-

genation of leghemoglobin, pea nodules, 598
sucrose-phosphate synthase activity, species and environmental variations, tobacco, 469
virulence of *Agrobacterium tumefaciens chv* mutants, different plant species, 113
*Atriplex confertifola*, effects of polyploidy on $C_4$ photosynthesis, 1143
Auxin
asymmetric application, sunflower hypocotyl curvature, 466
cytokinin ratios, chimeric isopentenyl transferase gene, tobacco, 808
induction of α-amylase activity, pea cotyledons, 484
inhibitory action, root elongation, pea, 310
physiology of tomato mutant *diageotropica*, 804
regulated plant defense gene, tobacco, 73
rooting ability of indole-3-butyric acid conjugates, mung bean cuttings, 1080
*Avena sativa* (*see* Oat)

B

*Bacillus subtilis*, enzymic analysis of feraxan, corn cell walls, 242
Bacteroids, soybean nodule, hydrogen inhibition of nitrogen reduction, nitrogenase, 663
Banana, ripening, 1436
Barley
aleurone layers
heat-stable proteins, abscisic acid action, 1520
phosphoinositides, gibberellic acid-induced changes, metabolism, 1266
culm strength, 876
DNaseI-sensitive regions of chromatin, DNA methylation reduction, 451
elongating stem tissue, soluble and bound isoforms, invertases, 993
embryos and young seedlings, α-amylase inhibitor synthesis, ABA and dehydration stress, 415
leaf
early greening phase, electron transport system, 409
light/dark modulation, enzyme activity, 1620
low temperature, respiration and phosphorylated intermediates, 905
photoinhibition, regulation of $CO_2$ assimilation, 1562
metabolic acclimation to hypoxia, 1063
mutant lacking NADH-dependent hydroxypyruvate reductase, metabolism of hydroxypyruvate, 395
pulvinus, localization and pattern, graviresponse, 744
root, plasma membrane microsomes, temperature effects on sulfhydryl reactivity, 1339
root-specific lectin, cloning, characterization, 124
seedling, nitrate transport, NADH and NAD(P)H nitrate reductase independence, 947
seedling leaf, role of nitrate and nitrite, induction of nitrite reductase, 1152
seed-specific tonoplast protein, distribution, 1006
shoot, oxygen and carbon dioxide fluxes, nitrate assimilation, 352
specific catalase isozymes, enhanced-peroxidatic activity, 812
*Bauhinia fassoglensis*, water transport, 1625
Bean
carbon partitioning, leaves, fruit and seeds, 291
developing seed, free and conjugated indole-3-acetic acid, 775
heliotropic leaf movements, controlled by air temperature, 1162
root nodules, subunit composition, glutamine synthetase isozymes, 1056
seed-specific tonoplast protein, distribution, 1006
stromal phosphate concentration, feedback limited photosynthesis, 679
variation in binding and virulence, *Agrobacterium tumefaciens chv* mutants, 113
Beet
leaf, biochemical mechanism, sucrose accumulation, 656
purification of $H^+$-translocating pyrophosphatase, vacuole membranes, 34
Benson-Calvin cycle, limitation of $CO_2$ assimilation, barley leaves, 1562
Bermudagrass, stolons, role of ethylene, geotropic response, 1251
Bicarbonate, formate-induced release, absence of, photosystem II in corn, 287
*Bidens pilosa*, cell wall architecture, 31
Branch, reoriented, compression wood formation and IAA, Douglas-fir, 338
*Brassica napus* (*see* Canola, Rapeseed)
*Brassica oleracea* (*see* Cabbage, Cauliflower)
Broad bean
guard cell protoplasts, ribulosebisphosphate carboxylase, photosynthetic $O_2$ evolution rate, 459
leaf, biochemical mechanism, sucrose accumulation, 656
polyphenoloxidase, polypeptide composition, amino-terminal sequence, 481
Bundle sheath cells
mechanism of $C_4$ photosynthesis, 1372
*Panicum miliaceum*
chloroplasts, phosphate translocator, 1507
inorganic carbon diffusion, 1356
Burrawong palm, seed-specific tonoplast protein, distribution, 1006

C

Cabbage, wilted leaves, water relations, turgor recovery, 433
Cadmium
inheritance and expression, mouse metallothionein gene, tobacco, 1020
zinc accumulation and, mechanism, tobacco suspension cells, 780
Calcium
-activated protein kinase, *Mougeotia*, 1613
-binding protein, antibodies, *Streptanthus tortuosus*, 1259
-dependent period, red light-induced late G1 phase, germinating *Adiantum* spores, 610
monoclonal antibodies against pectin, 1419
-selective microelectrodes, application, plant cells and tissues, 1239
Calsequestrin, antibodies against calcium-binding protein, *Streptanthus tortuosus*, 1259
Canola, germinating, properties, solubilized microsomal lipase, 1303
*Capsicum annuum* (*see* Pepper)
Carbohydrates
effects on internal oxygen concentration, nitrogenase activity, pea nodules, 603
supply, phytohormones, maize kernel abortion, 986
Carbon
anaerobic metabolism, tricarboxylic acid cycle, *Selenastrum minutum*, 1551
$C_4$ photosynthesis, $CO_2$ concentrating mechanism, *Xanthium strumarium*, 1364
flux, banana ripening, 1436
inorganic, diffusion in bundle sheath cells, *Panicum miliaceum*, 1356
light-induced polar pH changes, *Elodea canadensis* leaf, 62
photosynthetic metabolism, photoautotrophic cell suspension cultures, soybean and cotton, 1507
whole leaf exchange characteristics, phosphate deficiency, soybeans, 848
Carbon dioxide
glycolate metabolism determined by O-18, *Chlorella pyrenoidosa*, *Pavlova lutheri*, 1085
inhibition of active transport, hydrogen sulfide, cyanobacterium, 387
inhibition of fixation, glycoaldehyde, *Synechococcus* UTEX 625, 1044
leaf net assimilation, ambient and acute partial pressures of ozone, grape, 1501
low, prevention of nitrate reductase, spinach leaves, 970
oxygen fluxes and, nitrate assimilation, barley shoots, 352
-requiring phenotype, human carbonic anhydrase expression, *Synechococcus*, 505, 514
regulation of assimilation, photoinhibition, barley leaves, 1562
total photosynthetic electron flow, chlorophyll *a* fluorescence, algae, 331
Carbonic anhydrase, human, expression in cyanobacterium *Synechococcus*, 505, 514
Carboxysomes, expression of human carbonic anhydrase, *Synechococcus* PCC7942, 505, 514
Carnation
aging flower parts, 1-(malonylamino)cyclopropane-1-carboxylic acid-induced ethylene, 1126
ethylene-like activity of isocyanides, 669
β-Carotene, mode of action, photoinhibition, *Dunaliella bardawil*, 1040
Carotenoid, universal pathway of abscisic acid biosynthesis, $^{18}O$ incorporation patterns, cocklebur and tobacco, 1594
Carrot
ethylene-like activity of isocyanides, 669
heat shock response, 552
inositol trisphosphate metabolism, 477
purification and interconversion, homoserine dehydrogenase, 1569
variation in binding and virulence, *Agrobacterium tumefaciens chv* mutants, 113
wild, coregulation, dihydrofolate reductase and thymidylate synthase, 1168
Castor bean
elicitation of lignin biosynthesis, isoperoxidase activity by pectic fragments, 889
seed-specific tonoplast protein, distribu-

tion, 1006
Catalase, enhanced-peroxidatic activity in isozymes, tobacco, barley and maize, 812
*Catharanthus roseus*
developing seedlings, immunological detection, tryptophan decarboxylase, 79
vacuoles, uptake, 1-(malonylamino) cyclopropane-1-carboxylic acid, 1317
Cations
increased potassium absorption, rubidium-resistant rapeseed suspension cells, 1460
light saturated photosystem I electron transport, low growth temperature, monocots and dicots, 1308
Cauliflower, transformation using *Agrobacterium tumefaciens*, *bar* and *neo* genes, transgenic plants, 694
$C_3$-$C_4$ plants, $C_4$ photosynthesis, leaf anatomy, 1543
$C_4$ plants, mesophyll and bundle sheath chloroplasts, phosphate translocator, 1507
Cell cycle
control by phytochrome and calcium, germinating *Adiantum* spores, 610
effects of 3-(3,4-dichlorophenyl)-1,1-dimethylurea, *Euglena gracilis*, 1025
*vs.* photocycle control of photosynthesis, light/dark-synchronized *Amphidinium carteri*, 999
Cellulose
culm strength in barley, 876
oxygen isotope ratios, *Egeria densa*, 536
Cell wall
alteration of physical and chemical structure, growth-limited plant cells, osmotic stress, 39
changes in composition, water and saline stress adaptation, tobacco, 48
culm strength in barley, 876
deep supercooling of xylem parenchyma, cell wall layer, peach, 151
new ways to look at architecture, soybean, *Bidens pilosa*, 31
physiology of tomato mutant *diageotropica*, 804
tomato fruit, 816
*Ceratopteris*, salinized, psychrometric pressure-volume analysis, osmoregulation, 322
Chalcone, induction of *nod* genes, *Rhizobium meliloti*, alfalfa roots, 842
Chalcone synthase
flavanone glycoside biosynthesis, *Citrus*, 1323
mRNA, race-specific resistance, pathogen-inoculated soybeans, 911
Chilling
growth and development temperature, tolerance to high light stress, potato, 1558
low and high temperature limits to PSII, 1494
sensitivity, altitudinal ecotypes, wild tomato, 1471
Chitinase, bacterial, secretion, transgenic tobacco, 130
*Chlamydomonas reinhardtii*
chloroplast, gene dosage and expression, 648
kinetics of chlorophyll accumulation, greening, 1100
Chloramphenicol acetyltransferase
first intron of maize *shrunken-1* locus, grass species, 1575
wound-inducible proteinase inhibitor II, auxin regulation, tobacco, 73
*Chlorella autotrophica*, pyrroline-5-carboxylate reductase, relation to osmoregulation, 917
*Chlorella pyrenoidosa*, glycolate metabolism, carbon dioxide, O-18 labeling, 1085
Chlorophyll
accumulation, kinetics, *Chlamydomonas reinhardtii*, 1100
effects of polyploidy, $C_4$ photosynthesis, *Atriplex confertifola*, 1143
light-harvesting chlorophyll II and, reflected far-red light effects, 800
light-harvesting complex of photosystem II, light quality and irradiance, corn, 163
low and high temperature limits to PSII, Piperaceae, 1494
mode of action of $\beta$-carotene, *Dunaliella bardawil*, 1040
Chlorophyll *a* fluorescence
inhibition of carbon dioxide fixation, glycoaldehyde, *Synechococcus* UTEX 625, 1044
total photosynthetic electron flow in algae, 331
Chlorophyll *b*, functional analysis of photosynthetic apparatus, *Prochlorothrix hollandica*, 770
Chlorophyll *c*, light-harvesting, algae, 727
Chloroplasts
*Arabidopsis thaliana* mutant, enhanced thermal tolerance, palmitic acid unsaturation, 401
*Chlamydomonas reinhardtii*, gene dosage and expression, 648
diverse algae, chromophytic and rhodophytic ribulose-1,5-bisphosphate carboxylase, 939
DNA from ozone-treated plants, 8-hydroxyguanine content, 644
pea
D-enzyme characterization, 136
leaves, pyrroline-5-carboxylate reductase, 581
spinach
inorganic phosphate effects, thylakoid energization, 221
structural similarities, cytosolic class I fructose 1,6-bisphosphate aldolases, 1393
Choline, synthesis of ethanolamine and its regulation, *Lemna paucicostata*, 587
Chromatin, DNaseI-sensitive regions, DNA methylation reduction, 451
Chromoplast, -specific proteins, synthesis, pepper fruit development, 455
Chromosome, genotypic variation, glycinebetaine, public inbreds of corn, 1122
Citrus, flavanone glycoside biosynthesis, 1323
Citrus exocortis viroid, -induced pathogenesis-related proteinase P69, immunogold localization, tomato leaves, 119
Clathrin, -coated vesicles, storage protein transport, pea, 674
Cocklebur
$C_4$ photosynthesis, $CO_2$ concentrating mechanism, 1364
universal pathway of abscisic acid biosynthesis, $^{18}O$ incorporation patterns, 1594
Cold
acclimation, two forms of freezing injury, protoplasts of rye leaves, 1131
treatment, protein synthesis and mRNA levels, rice leaves, 930
*Conyza bonariensis*, paraquat-resistant, tolerance to photoinhibitory light, photoacoustic spectroscopy, 1174
Corn
absence of formate-induced bicarbonate release, photosystem II, 287
cell wall, enzymic analysis, feruloylated arabinoxylans, 242
development of isogenic sweet hybrids, glycinebetaine content, 1112
DNaseI-sensitive regions of chromatin, DNA methylation reduction, 451
first intron of *shrunken-1* locus, increased gene expression, grass species, 1575
fusicoccin receptors, properties, proteoliposomes, 1402
genetic transformation, particle bombardment, 440
kernel abortion, carbohydrate supply, phytohormones, 986
leaf
biochemical mechanism, sucrose accumulation, 656
hydroxypyruvate and glyoxylate reductases, 278
oxygen inhibition, nitrate reductase biosynthesis, 883
light quality and irradiance interaction, light-harvesting complex, photosystem II, 163
lysine-sensitive aspartate kinase, 1602
manipulation of membrane fatty acid compositions, 203
membrane-bound coupling factor, characteristics, magnesium-ATPase, 1107
mitochondria
electron transport, *Helminthosporium maydis* race T toxin, 1296
subunit composition, cytochrome *c*, 1535
pedicel region of kernels, glutamine synthetase, purification, 868
photosystem I, 445
public inbreds, genotypic variation, glycinebetaine, 1122
reconstitution, UDP-glucose sterol glucosyl transferase, 567
regulation of embryo dormancy, abscisic acid manipulation, 101
root
axial and radial hydraulic resistance, 719
decreased ethylene biosynthesis, 266
high affinity potassium uptake, 1202
hypoxic induction in tips, anoxia tolerance, 837
plasma membrane-associated electron transport protein, 1014
scutellum, lysophosphatidate acyltransferase activity, microsomes, 1288
specific catalase isozymes, enhanced-peroxidatic activity, 812
springback in root gravitropism, 1247
variation in binding and virulence, *Agrobacterium tumefaciens chv* mutants, 113
water deficits and reproduction, 862
Cotton
leaf, absorbance changes, xanthophyll cycle components, 542
photosynthetic carbon metabolism, pho-

toautotrophic cell suspension cultures, 1507
reflected far-red light effects, chlorophyll, light-harvesting chlorophyll II protein, 800
Cotyledons
control of α-amylase development, germination, mung bean seeds, 253
pea, induction of α-amylase activity by auxin, 484
rapeseed, lysophosphatidate acyltransferase activity, microsomes, 1288
soybean, arginine metabolism, 170
Cowpea, salinity effects on photosynthesis, mesophyll cells, 493
*Crassula argentea*, malate-induced hysteresis, phospho*enol*pyruvate carboxylase, 954
Cucumber
competition for gibberellin $A_4$ binding, substituted phthalimides, 823
peroxidase isoenzymes, hormonal regulation, distribution, 1609
variation in binding and virulence, *Agrobacterium tumefaciens chv* mutants, 113
*Cucumis melo* (*see* Muskmelon)
*Cucumis sativus* (*see* Cucumber)
*Cucurbita pepo* (*see* Pumpkin)
Culm, strength in barley, 876
*Cyanidium caldarium*, intracellular localization of enzymes, fatty acid-β-oxidation, 1476
Cyanobacteria
inhibition of active carbon dioxide transport, hydrogen sulfide, 387
*Synechococcus* PCC7942, expression of human carbonic anhydrase, 505, 514
*Synechococcus* UTEX 625, inhibition of carbon dioxide fixation, glycoaldehyde, 1044
*Cynodon dactylon* (*see* Bermudagrass)
Cytochrome *c*, subunit composition, corn mitochondria, 1535
Cytokinin, -to-auxin ratios, chimeric isopentenyl transferase gene, tobacco, 808
Cytokinin nucleosidase, kinetic comparison, tomato, 148
Cytoplasm, light-induced polar pH changes, *Elodea canadensis*, 68
Cytosol, glutamine synthetase, gene family, pea, 702

D

*Daucus carota* (*see* Carrot)
Dehydration, stress and abscisic acid, α-amylase inhibitor synthesis, barley embryos, 415
D-enzyme, pea chloroplast, characterization, 136
Deoxyribonucleic acid
algal rubisco divergence, 939
chloroplast, 8-hydroxyguanine content, ozone-treated plants, 644
effects of polyploidy, $C_4$ photosynthesis, *Atriplex confertifola*, 1143
gene dosage and gene expression, *Chlamydomonas reinhardtii* chloroplasts, 648
methylation reduction, DNaseI-sensitive regions, plant chromatin, 451
*Dianthus caryophyllus* (*see* Carnation)
3,(3,4-Dichlorophenyl)-1,1-dimethylurea, effects on cell cycle, *Euglena gracilis*, 1025
Diclofop-methyl, proton permeability, oat root tonoplast, 756
Dicotyledonous plants, soybean and *Bidens pilosa*, cell wall architecture, 31
Dicyclohexylcarbodiimide, prevention of *Helminthosporium maydis* actions, electron transport, corn mitochondria, 1296
Dihydrofolate reductase, thymidylate synthase and, coregulation, wild carrot overproducer cell lines, 1168
Dihydroxyacetone phosphate reductase, two isozymes, *Dunaliella tertiolecta*, 345
*Dolichos biflorus*, seed lectin, biosynthetic studies, 1382
Douglas-fir, reoriented branches, indole-3-acetic acid, compression wood formation, 338
*Dunaliella bardawil*, photoinhibition, mode of action, β-carotene, 1040
*Dunaliella salina*, mutants defective in haloadaptation, selection, characterization, 786
*Dunaliella tertiolecta*, two isozymes, dihydroxyacetone phosphate reductase, 345

E

*Egeria densa*, oxygen isotope ratios of cellulose, 536
Electron transport
early greening phase, barley leaves, 409
*Helminthosporium maydis* race T toxin effects, corn mitochondria, 1296
photosystem I, low growth temperature, monocots and dicots, 1308
plasma membrane-associated, maize roots, 1014
role of nonohmicity, plant mitochondria, 487
ELISA, abscisic acid, organic acid interference, 1467
*Elodea canadensis*, leaf, light-induced polar pH changes, 62, 68
Embryo, gibberellins in embryo-suspensor, *Phaseolus coccineus* seeds, heart stage, 362
Endosperm
developing wheat grains, properties, pyrophosphate:fructose-6-phosphate phosphotransferase, 421
palm, lysophosphatidate acyltransferase activity, microsomes, 1288
Enzymes
analysis of feruloyated arabinoxylans, corn cell walls, 242
ethylene biosynthesis, tomato, 1
Ethanolamine, synthesis and regulation, *Lemna paucicostata*, 587
Ethylene
action inhibitors, wound-induced gene expression, tomato pericarp, 157
alleviation of high temperature stress, kinetin, lettuce seeds, 733
biosynthesis, enzymes of, tomato, 1
decreased biosynthesis, adventitious roots, corn, 266
hormonal regulation and distribution, peroxidase isoenzymes, Cucurbitaceae, 1609
inhibitor aminoethoxyvinylglycine, nodule formation, alfalfa, 690
inhibitory action of auxin, root elongation, pea, 310
-like activity of isocyanides, pea and potato, carnation and carrot, 669
1-(malonylamino)cyclopropane-1-carboxylic acid-induced, aging carnation flower parts, 1126
role in geotropic response, bermudagrass stolons, 1251
timing of growth inhibition, shoot inversion, *Pharbitis nil*, 464
*Euglena gracilis*, effects of 3-(3,4-dichlorophenyl)-1,1-dimethylurea, cell cycle, 1025
*Euphorbia characias*, photosynthetic cell suspensions and detached leaves, comparison, oxygen exchange, 1075

F

Fatty acid, membrane, manipulation, Tween-fatty acid esters, 203
Fatty acid-β-oxidation, enzyme localization, *Cyanidium caldarium*, 1476
Feraxan, enzymic analysis, corn cell walls, 242
Fern
*Adiantum*, cell-cycle control, phytochrome and calcium, 610
salinized *Ceratopteris*, psychrometric pressure-volume analysis, osmoregulation, 322
Ferricyanide, light-induced polar pH changes, *Elodea canadensis*, 68
*Ficus awkeotsang*, makino achenes, characterization, pectinmethylesterase, 1445
Flavanone glycoside, biosynthesis in *Citrus*, 1323
Flavonoids
induction of rhizobial *nod* genes, alfalfa roots, 842
*nod* gene inducers, interactions, alfalfa seeds and roots, 1138
Flavoprotein, plasma membrane-associated electron transport, maize roots, 1014
Formate, -induced bicarbonate release, absence of, photosystem II in corn, 287
Freezing
deep supercooling of xylem parenchyma, cell wall layer, peach, 151
injury, cold acclimation, protoplasts of rye leaves, 1131
osmotic stress and, ATPase activity and protein composition, winter rye seedlings, 961
Fructose 1,6-bisphosphate, light/dark modulation of enzyme activity, barley leaves, 1620
Fructose 1,6-bisphosphate aldolases, structural similarities, spinach chloroplasts, 1393
Fructose 2,6-bisphosphate, banana ripening, 1436
Fusicoccin, receptors, proteoliposome properties, maize, 1402

G

Galactolipids effect of growth temperature, *Brassica napus* leaves, 924
Gas, exchange properties, combined low temperature-high light effects, jojoba leaves, 1580
Gene
bacterial chitinase, secretion, transgenic tobacco, 130
*bar* and *neo*, rapeseed and cauliflower transformation, *Agrobacterium tumefaciens*, 694

defense, auxin regulation, tobacco, 73
dosage and expression, *Chlamydomonas reinhardtii* chloroplasts, 648
enhanced osmotin accumulation, stable NaCl tolerance, tobacco cells, 855
family for cytosolic glutamine synthetase, pea, 702
first intron of maize *shrunken-1* locus, grass species, 1575
*Glb1*, molecular characterization, major maize embryo globulin, 636
isopentenyl transferase, cytokinin-to-auxin ratios, tobacco, 808
nitrogen assimilating enzymes, developing alfalfa nodules, 898
*nod*
induction by flavonoids, alfalfa roots, 842
interactions among inducers, alfalfa seed and roots, 1138
nuclear, blue-light regulation of transcript levels, pea, 1030
transformation by particle bombardment, maize cells, 440
transformation of soybean seed, *Agrobacterium tumefaciens* infection, 1212
transient expression in pollen, tomato, tobacco, 1270
wound-induced expression, ethylene action inhibitors, tomato pericarp, 157
Geotropism, role of ethylene, bermudagrass stolons, 1251
Germination
canola, properties, solubilized microsomal lipase, 1303
control of α-amylase development, cotyledons, mung bean seeds, 253
Gibberellic acid
greening in pea seedlings, 19
-induced changes in metabolism, phosphoinositides, barley aleurone layers, 1266
sucrose loading, isolated veins, pea, 259
Gibberellin $A_4$, competition for binding in cucumber, substituted phthalimides, 823
Gibberellins
embryo-suspenser of *Phaseolus coccineus* seeds, heart stage, embryo development, 362
endogenous, pea shoots, 1255
precursors, isolation from heavily pigmented tissues, pennycress, 1488
Globulin, maize, molecular characterization, *Glb1* gene, 636
4-α-D-Glucanotransferase, characterization in pea chloroplast, 136
Glucose 6-phosphate, banana ripening, 1436
Glutamate
-aspartate transporter, pea leaf mitochondria, 272
oxidation by mitochondria, inflorescence, voodoo lily, 530
short-term metabolite changes, transient ammonium assimilation, algae, 749
Glutamine synthetase
cytosolic, gene family, pea, 702
pedicel region of maize kernels, purification, characterization, 868
subunit composition of isozymes, root nodules of bean, 1056
Glycerol, two isozymes of dihydroxyacetone phosphate reductase, *Dunaliella tertiolecta*, 345
Glycinebetaine
differences in content, isogenic sweet corn hybrids, 1112
genotypic variation, public inbreds of maize, 1122
Glycine decarboxylase, spatial and temporal influences, cell-specific distribution, wheat and pea leaves, 1219
*Glycine max* (*see* Soybean)
Glycoaldehyde, inhibition of carbon dioxide fixation, *Synechococcus* UTEX 625, 1044
Glycolate, metabolism determined by O-18 labeling, carbon dioxide, *Chlorella pyrenoidosa* and *Pavlova lutheri*, 1085
Glyoxylate reductase, identification in maize leaves, 278
*Gossypium hirsutum* (*see* Cotton)
Grape
latent polyphenoloxidase, novel procedure for extraction, 1481
leaf net $CO_2$ assimilation, ambient and acute partial pressures, 1501
Gravitropism
asymmetric auxin application, sunflower hypocotyl curvature, 466
corn root, springback, 1247
high plant shoots, 1329
localization and pattern of graviresponse, pulvinus of barley, 744
phototropic response, decreased amplitude, mutants of *Arabidopsis thaliana*, 685
Greening, formation of chlorophyll-protein complexes, *Chlamydomonas reinhardtii*, 1100
*Griffithsia pacifica*, algal rubisco divergence, 939
Guard cells
broad bean protoplasts, ribulosebisphosphate carboxylase activity, photosynthetic $O_2$ evolution rate, 459
electrical signaling, sensory transduction, 795

H

Haloadaptation, defective *Dunaliella salina* mutants, selection, characterization, 786
$H^+$-ATPase, plasmalemma, $K^+/H^+$ exchange, tobacco, 298
Heat shock, response of carrot, 552
*Helianthus annuus* (*see* Sunflower)
*Helminthosporium maydis*, toxin effects on electron transport, dicyclohexylcarbodiimide, corn mitochondria, 1296
Herbicides, short residual sulfonylurea, cross-resistance, transgenic tobacco plants, 574
Hexose phosphates, respiration and, low temperature, darkened barley leaves, 905
Histidine, primary site of amitrole action, *Arabidopsis thaliana*, 1226
Homoserine dehydrogenase, purification and interconversion, carrot, 1569
*Hordeum vulgare* (*see* Barley)
Hybrids, anti-zeatin and anti-abscisic acid hybridomas, 144
Hydrogen, inhibition of nitrogen reduction, nitrogenase, soybean nodule bacteroids, 663
Hydrogen sulfide, inhibition of active carbon dioxide transport, cyanobacterium, 387
Hydroperoxide lyase, enzymatic conversion of lipoxygenase products, blue-green algae, 1280
8-Hydroxyguanine, content of chloroplast DNA, ozone-treated plants, 644
Hydroxypyruvate, metabolism in mutant barley, 395
Hydroxypyruvate reductase, identification in maize leaves, 278
Hypocotyls
curvature in sunflower, asymmetric auxin application, 466
physiology of tomato mutant *diageotropica*, 804
soybean, gravitropism, 1329
Hypoxia
induction of anoxia tolerance, corn root tips, 837
metabolic acclimation in winter cereals, 1063

I

Indoleacetic acid, role of ethylene, geotropic response, bermudagrass stolons, 1251
Indole-3-acetic acid
asymmetric application, sunflower hypocotyl curvature, 466
compression wood formation, reoriented branches, Douglas-fir, 338
free and conjugated, developing bean seeds, 775
hydrolysis of esters, exposure, mild alkaline conditions, 9
Indole-3-butyric acid, rooting ability of conjugates formed during rooting, mung bean cuttings, 1080
Inflorescence, oxidation by mitochondria, proline and glutamate, voodoo lily, 530
Inositol trisphosphate, metabolism in carrot, 477
Invertases, soluble and bound isoforms, barley elongating stem tissue, 993
Ions, sensory transduction and electrical signaling, guard cells, 795
Iron, phosphate starvation inducible metabolism, tomato, 175
Irradiance, photosystems I and II, phycobilisomes, *Porphyridium cruentum*, 1179
Irradiation, mode of action of β-carotene, *Dunaliella bardawil*, 1040
Isocyanides, ethylene-like activity, pea and potato, carnation and carrot, 669
Isopentenyladenosine, content in Scots pine seeds, rapid effects, red light, 5
Isopentenyl transferase, chimeric gene in tobacco, cytokinin-to-auxin ratios, morphology of shoots, 808
Isoperoxidase, activity and pectic fragments, lignin biosynthesis, castor bean, 889

J

Jojoba, leaf, gas exchange properties, combined low temperature-high light effects, 1580

K

Kinetin, 1-aminocyclopropane-1-carboxylic acid utilization, high temperature stress, lettuce seeds, 733

L

Lamellae, stromal and granal, thylakoid protein distribution, spirodela, 629
Leaf
anatomy, $C_4$ photosynthesis, $C_3$-$C_4$ species, 1543

barley
early greening phase, electron transport system, 409
low temperature, respiration and phosphorylated intermediates, 905
photoinhibition, regulation of $CO_2$ assimilation, 1562
barley seedlings, role of nitrate and nitrite, induction of nitrite reductase, 1152
bean
carbon partitioning, 291
heliotropic movements, air temperature, 1162
beet, biochemical mechanism, sucrose accumulation, 656
*Brassica napus*, growth temperature, galactolipids, 924
broad bean, biochemical mechanism, sucrose accumulation, 656
cabbage, water relations, turgor recovery, 433
corn
biochemical mechanism, sucrose accumulation, 656
hydroxypyruvate and glyoxylate reductases, 278
oxygen inhibition, nitrate reductase biosynthesis, 883
cotton
absorbance changes, xanthophyll cycle components, 542
reflected far-red light effects, chlorophyll and LHC-II, 800
cowpea, mesophyll cells, salinity and photosynthesis, 493
*Elodea canadensis*, light-induced polar pH changes, 62, 68
*Euphorbia characias*, oxygen exchange, photosynthetic cell suspensions, 1075
grape, net $CO_2$ assimilation, ambient and acute partial pressures of ozone, 1501
jojoba, gas exchange properties, combined low temperature-high light effects, 1580
oat, proteolytic activity, alkaline pH, 1414
pea
biochemical mechanism, sucrose accumulation, 656
chloroplasts, pyrroline-5-carboxylate reductase, 581
glutamate/aspartate transporter, mitochondria, 272
glycine decarboxylase localization, 1219
pumpkin, light-induced inhibition, photosystem II, 1069
rice
cold-treatment, protein synthesis and mRNA levels, 930
proteolysis, senescence, 1232
rye, cold acclimation, freezing injury in protoplasts, 1131
soybean
biochemical mechanism, sucrose accumulation, 656
carbon exchange characteristics, phosphate deficiency, 848
chalcone synthase mRNA, race-specific resistance, 911
spinach
biochemical mechanism, sucrose accumulation, 656
prevention of nitrate reductase, low carbon dioxide, 970
tobacco
biochemical mechanism, sucrose accumulation, 656
transient gene expression in pollen, 1270
tomato, immunogold localization, proteinase P69, 119
wheat, glycine decarboxylase localization, 1219
Lectin
*Dolichos biflorus* seeds, biosynthetic studies, 1382
root-specific, cloning, barley, 124
Leghemoglobin, measurement of fractional oxygenation, reflectance spectroscopy, pea nodules, 598
*Lemna paucicostata*, synthesis of ethanolamine and its regulation, 587
Lettuce
artefactual origins of cyclic AMP, 624
seed, thermoinhibition, kinetin and ethylene, 733
Light
adaptation/acclimation of photosynthesis, ribulose-1,5-bisphosphate carboxylase regulation, sun and shade plants, 379
blue, regulation of transcript levels, pea, 1030
-dark modulation of enzyme activity, barley leaves, 1620
functional analysis of photosynthetic apparatus, chlorophyll *b*, *Prochlorothrix hollandica*, 770
high, gas exchange properties at low temperature, jojoba leaves, 1580
high stress, growth and development temperature, potato, 1558
-induced inhibition, photosystem II, pumpkin leaves, 1069
-induced polar pH changes, *Elodea canadensis* leaf, 62, 68
-induced spectral absorbance changes, photosynthesis and xanthophyll cycles, cotton leaves, 542
low and high temperature limits to PSII, Piperaceae, 1494
photoinhibitory, photoacoustic spectroscopy, paraquat-resistant *Conyza bonariensis*, 1174
red
cell-cycle control by phytochrome and calcium, fern spores, 610
isopentenyladenosine content, Scots pine seeds, 5
reflected far-red, chlorophyll and LHC-II, cotton, 800
regulation of $\beta$-tubulin gene expression, internode development, soybean, 1157
-saturated photosystem I electron transport, low growth temperature, monocots and dicots, 1308
synchronized *Amphidinium carteri*, cell cycle *vs.* photocycle control, photosynthesis, 999
Light-harvesting chlorophyll II, reflected far-red light effects, cotton, 800
Light-harvesting complex
chlorophyll *c* involvement in algae, 727
photosystem II, light quality and irradiance, corn, 163
Lignin, elicitation of biosynthesis, isoperoxidase activity by pectic fragments, castor bean, 889
Lily, voodoo, inflorescence, oxidation by mitochondria, proline and glutamate, 530
Lipase, solubilized microsomal, properties, canola, 1303
Lipids
*Arabidopsis thaliana* mutant, enhanced thermal tolerance, palmitic acid unsaturation, 401
small unilamellar vesicles, reconstitution in pea, UDP-glucose sterol glucosyl transferase, 567
Lipoxygenase
enzymatic conversion, hydroperoxide lyase, blue-green algae, 1280
properties in blue-green algae, 367
*Lolium multiflorum* (*see* Ryegrass)
*Lupinus angustifolius*, protein bodies, isolation, characterization, 1425
*Lycopersicon esculentum* (*see* Tomato)
Lysine, -sensitive aspartate kinase, maize cell cultures, 1602
Lysophosphatidate acyltransferase, activity in microsomes, oil seeds, 1288

## M

Magnesium, net uptake, competitive aluminum inhibition, *Lolium multiflorum* roots, 1407
Magnesium-ATPase, characteristics, membrane-bound maize coupling factor, 1107
Maize (*see* Corn)
Malate, -induced hysteresis, phosphoenolpyruvate carboxylase, *Crassula argentea*, 954
1-(Malonylamino)cyclopropane-1-carboxylic acid
carrier-mediated uptake in vacuoles, *Catharanthus roseus* cells, 1317
-induced ethylene, aging carnation flower parts, 1126
*Mantoniella squamata*, chlorophyll *c* involved in light-harvesting, 727
*Medicago sativa* (*see* Alfalfa)
Membrane, role of nonohmicity, electron transport, plant mitochondria, 487
Mesophyll cells
$C_4$, inorganic carbon diffusion, *Panicum miliaceum*, 1356
chloroplasts, phosphate translocator, *Panicum miliaceum*, 1507
cowpea, salinity effects, photosynthesis, 493
Metallothionein, mouse gene inheritance and expression, tobacco, 1020
Microelectrodes, calcium-selective, application, plant cells and tissues, 1239
Microsomes
barley root plasma membrane, temperature-induced protein conformational changes, 1339
germinating canola, properties, solubilized lipase, 1303
Mitochondria
corn
electron transport, *Helminthisporium maydis* race T toxin, 1296
subunit composition, cytochrome *c*, 1535
*Cyanidium caldarium*, enzyme localization, fatty acid-$\beta$-oxidation, 1476
oligomycin-sensitivity conferring protein, 526
oxidation of proline and glutamate, inflorescence, voodoo lily, 530
pea leaf, glutamate/aspartate transporter, 272
potato, role of nonohmicity, electron trans-

port, 487
Monoclonal antibodies
glutamate/aspartate transporter, pea leaf mitochondria, 272
pectin, conformation induced by calcium, 1419
Monocots, maize cells, genetic transformation, particle bombardment, 440
*Mougeotia*, calcium-activated protein kinase, detection, synthetic peptide substrates, 1613
Mung bean
branched-chain 2-oxo acids, peroxisomal degradation, 1387
indole-3-butyric acid conjugates, rooting ability, 1080
manipulation of membrane fatty acid compositions, 203
seed, α-amylase development, cotyledons, 253
seed-specific tonoplast protein, distribution, 1006
subtilisin inhibitor, partial characterization, 106
Muscle cells, antibodies against calcium-binding protein, *Streptanthus tortuosus*, 1259
Muskmelon, sucrose phosphate synthase and acid invertase, 1527
Mutation, physiology of tomato mutant *diageotropica*, 804

N

NADH, -dependent hydroxypyruvate reductase, deficiency, hydroxypyruvate metabolism in mutant barley, 395
NADP, electron transport system, early greening phase, barley leaves, 409
$NADP^+$-glyceraldehyde-3-phosphate dehydrogenase, light/dark modulation of enzyme activity, barley leaves, 1620
NAD(P)H nitrate reductase, nitrate transport, barley seedlings, 947
*Neurospora crassa*, plasma membrane, calcium activation, electrogenic proton pump, 213
*Nicotiana* (*see* Tobacco)
Nitrate
assimilation, oxygen and carbon dioxide fluxes, barley shoots, 352
nitrite and, induction of nitrite reductase, barley seedling leaves, 1152
total photosynthetic electron flow, chlorophyll *a* fluorescence, algae, 331
transport, independence from NADH and NAD(P)H nitrate reductase, barley seedling, 947
Nitrate reductase
oxygen inhibition of biosynthesis, total soluble protein synthesis, detached corn leaves, 883
prevention in spinach leaves, low carbon dioxide, 970
structural gene, deregulation of expression, tungstate, 304
Nitrite reductase, role of nitrate and nitrite, leaves, barley seedlings, 1152
Nitrogen
assimilating enzyme activities, enzyme protein development, alfalfa nodules, 898
cyclic variations in uptake rate, soybean, 1345
inorganic, net $O_2$ exchange, *Anacystis nidulans*, 28
maize kernel pedicel glutamine synthetase, 868
metabolism, nuclear magnetic resonance study, white spruce buds, 193
phosphate starvation inducible metabolism, tomato, 175
-starvation, decreased ethylene biosynthesis, corn roots, 266
Nitrogenase
activity in detached pea nodules, carbohydrate effects, internal oxygen concentration, 603
hydrogen inhibition of nitrogen reduction, soybean nodule bacteroids, 663
Nodules
alfalfa
development, nitrogen assimilating enzyme activities, 898
formation stimulated by aminoethoxyvinylglycine, 690
Nuclear magnetic resonance
nitrogen metabolism, shoot-forming cultures, white spruce buds, 193
spectroscopy and, xenobiotic monitoring, tomato, 1243

O

Oat
leaf, proteolytic activity, alkaline pH, 1414
plasma membrane, polyphosphoinositide phospholipase C, 1275
protoplasts, polyamine binding to proteins, 738
purified phytochrome, polycation-stimulated protein kinase, 709
root tonoplast, proton permeability, diclofop-methyl, 756
variation in binding and virulence, *Agrobacterium tumefaciens chv* mutants, 113
Oligomycin, -sensitivity conferring protein, 526
*Olisthodiscus luteus*, algal rubisco divergence, 939
Organic acid
cadmium and zinc accumulation, mechanism, tobacco suspension cells, 780
interference, abscisic acid ELISA, 1467
*Oryza sativa* (*see* Rice)
*Oscillatoria*
hydroperoxide lyase, enzymatic conversion, lipoxygenase products, 1280
properties of lipoxygenase, 367
Osmometry, osmotic pressure, aqueous polyethylene glycols, 766
Osmoregulation
psychrometric pressure-volume analysis, salinized *Ceratopteris*, 322
pyrroline-5-carboxylate reductase, *Chlorella autotrophica*, *C. saccharophila*, 917
Osmosis
*Dunaliella salina* mutants, haloadaptation defect, characterization, 786
freezing and, ATPase and protein composition, winter rye seedlings, 961
growth-limited plant cells, cell wall alteration, tobacco, 39
Osmotin, enhanced accumulation, stable NaCl tolerance, tobacco cells, 855
2-Oxo acids, branched-chain, peroxisomal degradation, mung bean, 1387
Oxygen
carbon dioxide fluxes and, nitrate assimilation, barley shoots, 352
changes induced by inorganic nitrogen, *Anacystis nidulans*, 28
-deficit stress, polyamines, rice seedlings, 1197
exchange, photosynthetic cell suspensions and detached leaves, *Euphorbia characias*, 1075
fractional oxygenation of leghemoglobin, measurement, pea nodules, 598
gradual increases in concentration, nodule activity, soybean, 315
inhibition of nitrate reductase biosynthesis, total soluble protein synthesis, detached corn leaves, 883
internal concentration, carbohydrate effects, pea nodules, 603
light-induced inhibition of photosystem II, pumpkin leaves, 1069
$^{18}O$ incorporation patterns, pathway of abscisic acid biosynthesis, cocklebur and tobacco, 1594
Oxygen-18
content of atmospheric oxygen, water and cellulose relationship, *Egeria densa*, 536
glycolate metabolism, carbon dioxide, *Chlorella pyrenoidosa* and *Pavlova lutheri*, 1085
Ozone
ambient and acute partial pressures, leaf net $CO_2$ assimilation, grape, 1501
-treated plants, 8-hydroxyguanine content, chloroplast DNA, 644
-treated potato foliage, rubisco activity, net photosynthesis, 427

P

Palm, endosperm, lysophosphatidate acyltransferase activity, microsomes, 1288
Palmitic acid, unsaturation, enhanced thermal tolerance, *Arabidopsis thaliana* mutant, 401
*Panicum miliaceum*
$C_4$ mesophyll and bundle sheath cells, inorganic carbon diffusion, 1356
mesophyll and bundle sheath chloroplasts, phosphate translocator, 1507
Paraquat, -resistant *Conyza bonariensis*, tolerance to photoinhibitory light, photoacoustic spectroscopy, 1174
*Pavlova gyrans*, chlorophyll *c* involvement in light-harvesting, 727
*Pavlova lutheri*, glycolate metabolism, carbon dioxide, O-18 labeling, 1085
Pea
characterization of chloroplast D-enzyme, 136
cotyledons, induction of α-amylase activity by auxin, 484
DNaseI-sensitive regions of chromatin, DNA methylation reduction, 451
ethylene-like activity of isocyanides, 669
gene family for cytosolic glutamine synthetase, 702
leaf
biochemical mechanism, sucrose accumulation, 656
glutamate/aspartate transporter, mitochondria, 272
glycine decarboxylase localization, 1219
leaf, chloroplasts, pyrroline-5-carboxylate reductase, 581
manipulation of membrane fatty acid compositions, 203
membranes, incorporation of UDP-glu-

cose, xyloglucan, 373
nodules
carbohydrate effects, internal oxygen concentration, 603
measurement, fractional oxygenation of leghemoglobin, 598
oligomycin-sensitivity conferring protein, 526
ozone-treated, 8-hydroxyguanine content, chloroplast DNA, 644
purification and characterization, *S*-adenosyl-L-methionine:6a-hydroxymaackiain 3-*O*-methyltransferase, 559
root elongation, inhibitory action of auxin, 310
seedling greening, gibberellic acid effects, 19
seed-specific tonoplast protein, distribution, 1006
shoot, endogenous gibberellins, 1255
specific transcript levels, blue-light regulation, 1030
sucrose loading, isolated veins, 259
transport of storage proteins, coated vesicles, 674
variation in binding and virulence, *Agrobacterium tumefaciens chv* mutants, 113
Peach, deep supercooling of xylem parenchyma, involvement, cell wall layer, 151
Pectinmethylesterase, characterization, *Ficus awkeotsang* makino achenes, 1445
Pectins
developmental changes, tomato fruit cell wall, 816
monoclonal antibodies, conformation induced by calcium, 1419
Pennycress, isolation of gibberellin precursors, heavily pigmented tissues, 1488
*Peperomia camptotricha*, kinetic properties, phospho*enol*pyruvate carboxylase, 1050
Pepper, fruit development, synthesis, chromoplast-specific proteins, 455
Peroxidase, isoenzymes, hormonal regulation and distribution, Cucurbitaceae, 1609
Peroxisomes, degradation of branched-chain 2-oxoacids, mung bean, 1387
Petunia
manipulation of membrane fatty acid compositions, 203
protoplasts, polyamine binding to proteins, 738
pH
alkaline, proteolytic activity, oat leaves, 1414
high affinity potassium uptake, maize roots, 1202
light-induced polar changes in leaves, *Elodea canadensis*, 62, 68
mechanisms of aluminum tolerance, wheat, 1188
mild alkaline conditions, hydrolysis, indole-3-acetic acid esters, 9
role of plasmalemma $H^+$-ATPase, $K^+/H^+$ exchange, tobacco, 298
*Phaeodactylum tricornutum*, chlorophyll *c* involved in light-harvesting, 727
*Pharbitis nil*, shoot inversion, timing of growth inhibition, 464
*Phaseolus coccineus*, seed, gibberellins in embryo-suspensor, heart stage, 362
*Phaseolus vulgaris* (*see* Bean)
Phenylalanine, ammonia-lyase activity, abscisic acid suppression, soybean, 23
Phosphate
deficiency in soybeans, whole leaf carbon exchange, 848
inorganic, thylakoid energization, spinach chloroplasts, 221
-starvation, decreased ethylene biosynthesis, corn roots, 266
starvation inducible metabolism, tomato, 175
stromal, feedback limited photosynthesis, bean, 679
translocator, mesophyll and bundle sheath chloroplasts, *Panicum miliaceum*, 1507
Phosphate synthase, -sucrose activity, species and environmental variations, tobacco, 469
Phospho*enol*pyruvate carboxylase
kinetic properties, *Peperomia camptotricha*, 1050
malate-induced hysteresis, *Crassula argentea*, 954
Phosphoethanolamine, synthesis of ethanolamine and its regulation, *Lemna paucicostata*, 587
Phosphoinositides, gibberellic acid-induced changes in metabolism, barley aleurone layers, 1266
Phospholipid, reconstitution, UDP-glucose sterol glucosyl transferase, 567
Phosphorylation, oxidative, plant oligomycin-sensitivity conferring protein, 526
Photoinhibition
mode of action of β-carotene, *Dunaliella bardawil*, 1040
sequential events, sodium stress, *Synechocystis*, 91
Photorespiration, hydroxypyruvate reductase deficient mutant barley, hydroxypyruvate metabolism, 395
Photosynthesis
$C_4$
$CO_2$ concentrating mechanism, *Xanthium strumarium*, 1364
leaf anatomy, $C_3$-$C_4$ species, 1543
mechanism, bundle sheath cells, 1372
carbon metabolism, photoautotrophic cell suspension cultures, soybean and cotton, 1507
cell cycle *vs.* photocycle control, light/dark-synchronized *Amphidinium carteri*, 999
effects of polyploidy, *Atriplex confertifola*, 1143
electron transport system, early greening phase, barley leaves, 409
feedback limited, stromal phosphate concentration, bean, 679
functional analysis, *Prochlorothrix hollandica*, 770
light adaptation/acclimation, ribulose-1,5-bisphosphate carboxylase activity, sun and shade plants, 379
light-induced spectral absorbance changes, xanthophyll cycle components, cotton leaves, 542
$O_2$ evolution rate, ribulosebisphosphate carboxylase activity, broad bean guard cell protoplasts, 459
pigment analysis, reversed phase-HPLC method, 190
prevention of nitrate reductase, low carbon dioxide, spinach leaves, 970
rubisco activity, ozone-treated potato foliage, 427
total electron flow, chlorophyll *a* fluorescence, algae, 331
Photosystem I
electron transport, low growth temperature, monocots and dicots, 1308
photosystem II and phycobilisomes, stoichiometry, *Porphyridium cruentum*, 1179
subunit binding plastocyanin, maize, 445
Photosystem II
absence of formate-induced bicarbonate release, corn, 287
distribution of thylakoid proteins, stromal and granal lamellae, spirodela, 629
light-harvesting complex, light quality and irradiance, corn, 163
light-induced inhibition, pumpkin leaves, 1069
low and high temperature limits, Piperaceae, 1494
Phototropism
decreased amplitude, *Arabidopsis thaliana* mutants, 685
*Phycomyces*, novel effect, 1586
Phthalimides, substituted, competition for gibberellin $A_4$ binding, cucumber, 823
Phycobilisomes, photosystems I and II, stoichiometry, *Porphyridium cruentum*, 1179
*Phycomyces*, phototropism, novel effect, 1586
Phytoalexins, *S*-adenosyl-L-methionine:6a-hydroxymaackiain 3-*O*-methyltransferase, purification, pea, 559
Phytochrome
cell-cycle control, $Ca^{2+}$-dependent period, fern spores, 610
oat, polycation-stimulated protein kinase, 709
Phytohormones, carbohydrate supply and, maize kernel abortion, 986
*Phytophthora megasperma*, resistance of soybeans, phenyalanine ammonia-lyase activity, abscisic acid, 23
*Picea glauca* (*see* Spruce, white)
Pigment, biosynthesis, primary site of amitrole action, *Arabidopsis thaliana*, 1226
Pine
artefactual origins of cyclic AMP, 624
seed, red light effects, isopentenyladenosine content, 5
seed-specific tonoplast protein, distribution, 1006
Piperaceae, low and high temperature limits to PSII, 1494
*Pisum sativa* (*see* Pea)
*Plantago major*, root respiration and growth, vesicular-arbuscular mycorrhizal infection, 227
Plasmalemma
$H^+$-ATPase, $K^+/H^+$ exchange, tobacco, 298
mechanisms of aluminum tolerance, wheat, 1188
sucrose loading in isolated veins of pea, 259
Plasma membrane
-associated electron transport, maize roots, 1014
barley root microsomes, temperature effects, sulfhydryl reactivity, 1339
cold acclimation, freezing injury in proto-

plasts, rye leaves, 1131
*Neurospora crassa*, calcium activation, electrogenic proton pump, 213
oat, polyphosphoinositide phospholipase C, 1275
wheat root, cation binding, aluminum, 233
winter rye seedlings, freezing and osmotic stress, ATPase and protein composition, 961
Plastids, barley leaves, electron transport system, early greening phase, 409
Plastocyanin, identification of binding subunit, photosystem I, maize, 445
Pollen, tobacco, transient gene expression, 1270
Pollination, abscisic acid levels, early seed development, *Schium edule*, 1351
Polyamines
binding to proteins, oat and petunia protoplasts, 738
metabolism of potato seed-tubers, long-term storage, early sprout development, 183
modulators of salt tolerance, rice cultivars, 500
oxygen-deficit stress, rice seedlings, 1197
Polycation, -stimulated protein kinase, purified oat phytochrome, 709
Polyethylene glycols, aqueous, osmotic pressure, 766
Polygalacturonase, tomato fruit cell wall, 816
Polyphenoloxidase
broad bean, polypeptide composition, amino-terminal sequence, 481
latent, novel procedure for extraction, grape, 1481
Polyphosphoinositide phospholipase C, oat plasma membrane, 1275
Polysaccharides, extracellular, water and saline stress adaptation, tobacco, 54
*Populus nigra*, photosynthetic pigment analysis, HPLC, 190
*Porphyridium cruentum*, photosystems I and II, phycobilisomes, stoichiometry, 1179
Potassium
absorption, resistance to cations, rubidium-resistant rapeseed suspension cells, 1460
direct measurement of channels, thylakoid membranes, spinach, 249
high affinity uptake, maize roots, 1202
mechanisms of aluminum tolerance, wheat, 1188
role of plasmalemma $H^+$-ATPase, tobacco, 298
Potassium chloride, proteolysis, senescing rice leaves, 1232
Potato
ethylene-like activity of isocyanides, 669
immunocytochemical localization, ADPglucose pyrophosphorylase, 217
level of tolerance to high light stress, growth and development temperature, 1558
mitochondria, role of nonohmicity, electron transport, 487
ozone-treated foliage, rubisco activity, net photosynthesis, 427
polyamine metabolism of seed-tubers, long-term storage, early sprout development, 183
variation in binding and virulence, *Agrobacterium tumefaciens chv* mutants, 113
Pressure, osmotic, aqueous polyethylene glycols, 766
*Prochlorothrix hollandica*, functional analysis of photosynthetic apparatus, 770
Proline, oxidation by mitochondria, inflorescence, voodoo lily, 530
Propeptide, wheat germ agglutinin, production of antibody, 473
Protein
chromoplast-specific, synthesis, pepper fruit development, 455
composition, freezing and osmotic stress, winter rye seedlings, 961
heat shock response of carrot, 552
oligomycin-sensitivity conferring protein, 526
polyamine binding, oat and petunia protoplasts, 738
seed storage, transcription and mRNA levels, rapeseed, 617
storage, transport by coated vesicles, pea, 674
synthesis, cold-treatment and mRNA levels, rice leaves, 930
synthesis in detached corn leaves, oxygen inhibition, nitrate reductase biosynthesis, 883
Proteinase inhibitor II, plant defense gene, auxin regulation, tobacco, 73
Proteinase P69, pathogenesis-related, immunogold localization, tomato leaves, 119
Protein bodies, *Lupinus angustifolius*, isolation, characterization, 1425
Protein kinase
calcium-activated, *Mougeotia*, 1613
polycation-stimulated, purified oat phytochrome, 709
Proteoliposomes, fusicoccin receptors in maize, 1402
Proteolysis
alkaline pH, oat leaves, 1414
senescing rice leaves, 1232
Proton
direct measurement of potassium channels, thylakoid membranes, spinach, 249
electrogenic pump, calcium activation, *Neurospora* plasma membrane, 213
high affinity potassium uptake, maize roots, 1202
light-induced polar pH changes, *Elodea canadensis*, 68
mechanisms of aluminum tolerance, wheat, 1188
permeability, diclofop-methyl, oat root tonoplast, 756
role of plasmalemma $H^+$-ATPase, tobacco, 298
-translocating inorganic pyrophosphatase, vacuole membranes, red beet, 34
Protoplasts
broad bean guard cells, ribulosebisphosphate carboxylase activity, photosynthetic $O_2$ evolution rate, 459
oat and petunia, polyamine binding to proteins, 738
rye leaves, cold acclimation, freezing injury, 1131
volume in spinach, water potential relationship, bound water fraction, 13
*Prunus persica* (*see* Peach)
*Prymnesium parvum*, chlorophyll *c* involved in light-harvesting, 727
*Pseudomonas syringae*, -induced $K^+/H^+$ exchange, plasmalemma $H^+$-ATPase role, tobacco, 298
*Pseudotsuga meziesii* (*see* Douglas-fir)
Pulvini, barley, localization and pattern, graviresponse, 744
Pumpkin, leaf, light-induced inhibition, photosystem II, 1069
Pyrophosphatase, $H^+$-translocating, purification from vacuole membranes, red beet, 34
Pyrophosphate:fructose-6-phosphate phosphotransferase, properties, endosperm, developing wheat grains, 421
Pyrroline-5-carboxylate reductase
content of pea leaf chloroplasts, 581
relation to osmoregulation, *Chlorella autotrophica*, *C. saccharophila*, 917
Pyruvate, banana ripening, 1436
Pyruvate kinase, short-term metabolite changes, transient ammonium assimilation, algae, 749

## R

Radish, nuclear gene expression, late seed maturation, 829
Rapeseed
cotyledon, lysophosphatidate acyltransferase activity, microsomes, 1288
leaf, temperature and galactolipids, 924
rubidium-selected suspension cells, increased potassium absorption, resistance to cations, 1460
seed storage protein transcription, mRNA levels, 617
transformation using *Agrobacterium tumefaciens*, *bar* and *neo* genes, transgenic plants, 694
*Raphanus sativus* (*see* Radish)
Receptors, fusicoccin, proteoliposome properties, maize, 1402
Reproduction, maize, water deficits, 862
Respiration
phosphorylated intermediates and, low temperature, darkened barley leaves, 905
role of nonohmicity, electron transport, plant mitochondria, 487
root, mycorrhizal infection, *Plantago major*, 227
*Rhizobium meliloti*, induction of *nod* genes by flavonoids, alfalfa roots, 842
Ribonucleic acid
gene dosage and gene expression, *Chlamydomonas reinhardtii* chloroplasts, 648
molecular characterization of *Glb1* gene, major maize embryo globulin, 636
specific transcript levels, blue-light regulation, pea, 1030
Ribonucleic acid, messenger
chalcone synthase, race-specific resistance, pathogen-inoculated soybeans, 911
effects of cold-treatment on protein synthesis, rice leaves, 930
light regulation of $\beta$-tubulin gene expression, internode development, soybean, 1157
radish nuclear gene expression, late seed maturation, 829
root-specific barley lectin, cloning, characterization, 124
seed storage protein transcription, exogenous abscisic acid response, rapeseed, 617
Ribulose-1,5-bisphosphate, limitation of $CO_2$

assimilation, barley leaves, 1562
Ribulose-1,5-bisphosphate carboxylase
chromophytic and rhodophytic, similarities, diverse algae, 939
regulation in sun and shade plants, light adaptation/acclimation, photosynthesis, 379
Ribulosebisphosphate carboxylase, photosynthetic $O_2$ evolution rate, broad bean guard cell protoplasts, 459
Ribulose bisphosphate carboxylase/oxygenase, decline of activity and quantity, net photosynthesis, ozone-treated potato foliage, 427
Ribulose-5-phosphate kinase, light/dark modulation of enzyme activity, barley leaves, 1620
Rice
artefactual origins of cyclic AMP, 624
leaf
cold-treatment, protein synthesis and mRNA levels, 930
proteolysis, senescence, 1232
salt tolerance, polyamines as modulators, 500
seedling, polyamines, oxygen-deficit stress, 1197
*Ricinus communis* (*see* Castor bean)
Ripening
banana, 1436
tomato, kinetic comparison, cytokinin nucleosidase, 148
Root
alfalfa
induction of rhizobial *nod* genes, flavonoids, 842
interactions, flavonoid *nod* gene inducers, 1138
barley, plasma membrane microsomes, temperature effects on sulfhydryl reactivity, 1339
bean, subunit composition, glutamine synthetase isozymes, 1056
corn
axial and radial hydraulic resistance, 719
decreased ethylene biosynthesis, 266
gravitropism, springback, 1247
high affinity potassium uptake, 1202
plasma membrane-associated electron transport protein, 1014
mung bean, indole-3-butyric acid conjugates, 1080
oat, proton permeability of tonoplast, diclofop-methyl, 756
pea, elongation, inhibitory action of auxin, 310
*Plantago major*, respiration, mycorrhizal infection, 227
rice seedling, polyamines, oxygen-deficit stress, 1197
ryegrass, competitive aluminum inhibition, net magnesium uptake, 1407
salinized *Ceratopteris*, psychrometric pressure-volume analysis, osmoregulation, 322
soybean
chalcone synthase mRNA, race-specific resistance, 911
hydraulic conductivity, sodium choride effects, 1262
wheat
mechanisms of aluminum tolerance, 1188
plasma membrane proteins, cation binding, 233
wheat seedling, stress-induced accumulation, wheat germ agglutinin and abscisic acid, 1432
Rubidium, -selected suspension cells of rapeseed, increased potassium absorption, resistance to cations, 1460
Rye
leaf protoplasts, cold acclimation, freezing injury, 1131
seedling, freezing and osmotic stress, ATPase and protein composition, 961
Ryegrass, root, competitive aluminum inhibition, net magnesium uptake, 1407

S

Salinity, photosynthesis effects, mesophyll cell, cowpea leaves, 493
Salt
stress adaptation
cell wall composition changes, tobacco, 48
extracellular polysaccharides, tobacco, 54
tolerance, polyamines as modulators, rice cultivars, 500
*Sauromatum guttatum* (*see* Lily, voodoo)
Scutellum, corn, lysophosphatidate acyltransferase activity, microsomes, 1288
*Sechium edule*, early seed development, abscisic acid levels, 1351
Seed
alfalfa, interactions, flavonoid *nod* gene inducers, 1138
bean
carbon partitioning, 291
free and conjugated indole-3-acetic acid, 775
development in soybean, effect of water deficits, 975, 980
*Dolichos biflorus*, lectin, biosynthetic studies, 1382
*Ficus awkeotsang* makino achenes, characterization, pectinmethylesterase, 1445
lettuce, thermoinhibition, kinetin and ethylene, 733
*Lupinus angustifolius*, characterization, protein bodies, 1425
mung bean
$\alpha$-amylase development, cotyledons, 253
subtilisin inhibitor, partial characterization, 106
oil, lysophosphatidate acyltransferase activity, microsomes, 1288
pea, storage protein transport, coated vesicles, 674
*Phaseolus coccineus*, gibberellins in embryo-suspensor, heart stage, 362
pine, red light effects, isopentenyladenosine content, 5
radish, late maturation, nuclear gene expression, 829
rapeseed, storage protein transcription, mRNA levels, 617
*Sechium edule*, early development, abscisic acid levels, 1351
soybean, transformation, *Agrobacterium tumefaciens*, 1212
-specific tonoplast protein, distribution, various plants, 1006
sunflower seedhead removal, whole plant senescence, 85
Seedling
barley
$\alpha$-amylase inhibitor synthesis, ABA and dehydration stress, 415
nitrate transport, NADH and NAD(P)H nitrate reductase independence, 947
*Catharanthus roseus*, immunological detection, tryptophan decarboxylase, 79
pea, greening, gibberellic acid effects, 19
rice, polyamines, oxygen-deficit stress, 1197
rye, freezing and osmotic stress, ATPase and protein composition, 961
tobacco, mouse metallothionein gene, inheritance and expression, 1020
transgenic tobacco plants, cross-resistance, short residual sulfonylurea herbicides, 574
wheat, stress-induced accumulation, wheat germ agglutinin and abscisic acid, 1432
*Selenastrum minutum*
anaerobic carbon metabolism, tricarboxylic acid cycle, 1551
chlorophyll *a* fluorescence, total photosynthetic electron flow, 331
short-term metabolite changes, transient ammonium assimilation, 749
Senescence
aging carnation flower parts, 1-(malonylamino)cyclopropane-1-carboxylic acid-induced ethylene, 1126
long-term storage and early sprout development, polyamine metabolism, potato seed-tubers, 183
nitrogen assimilating enzymes, developing alfalfa nodules, 898
ozone-treated potato foliage, rubisco activity, net photosynthesis, 427
rice leaves, proteolysis, 1232
whole plant, after seedhead removal, sunflower, 85
Shoot
barley, oxygen and carbon dioxide fluxes, nitrate assimilation, 352
-forming cultures of white spruce buds, nuclear magnetic resonance study, nitrogen metabolism, 193
pea, endogenous gibberellins, 1255
*Pharbitis nil*, inversion, timing of growth inhibition, 464
salinized *Ceratopteris*, psychrometric pressure-volume analysis, osmoregulation, 322
tobacco, chimeric isopentenyl transferase gene, cytokinin-to-auxin ratios, 808
*Simmondsia chinensis* (*see* Jojoba)
Sodium, stress, photoinhibition, *Synechocystis*, 91
Sodium chloride
effects on hydraulic conductivity, soybean root systems, 1262
proteolysis, senescing rice leaves, 1232
stable tolerance in tobacco cells, enhanced accumulation, osmotin, 855
*Solanum tuberosum* (*see* Potato)
Soybean
abscisic acid suppression, phenylalanine ammonia-lyase activity, 23
cell wall architecture, 31
developing cotyledons, arginine metabolism, 170
hypocotyls, gravitropism, 1329
internode development, light regulation, $\beta$-tubulin gene expression, 1157
leaf, biochemical mechanism, sucrose accumulation, 656

light adaptation/acclimation of photosynthesis, ribulose-1,5-bisphosphate carboxylase regulation, 379
manipulation of membrane fatty acid compositions, 203
nitrogen uptake rate, cyclic variations, 1345
nodule activity, gradual increases, oxygen concentration, 315
nodule bacteroids, hydrogen inhibition of nitrogen reduction, nitrogenase, 663
pathogen-inoculated, chalcone synthase mRNA, race-specific resistance, 911
phosphate deficient, whole leaf carbon exchange, 848
photosynthetic carbon metabolism, photoautotrophic cell suspension cultures, 1507
root, hydraulic conductivity, sodium chloride effects, 1262
seed development, effect of water deficits, 975, 980
seed-specific tonoplast protein, distribution, 1006
transformation by infection of germinating seeds, *Agrobacterium tumefaciens*, 1212
variation in binding and virulence, *Agrobacterium tumefaciens chv* mutants, 113
Spectroscopy
photoacoustic, photoinhibitory light, paraquat-resistant *Conyza bonariensis*, 1174
reflectance, fractional oxygenation of leghemoglobin, pea nodules, 598
Spinach
chloroplasts
inorganic phosphate effects, thylakoid energization, 221
structural similarities, cytosolic class I fructose 1,6-bisphosphate aldolases, 1393
direct measurement of potassium channels, thylakoid membranes, planar lipid bilayers, 249
leaf
biochemical mechanism, sucrose accumulation, 656
prevention of nitrate reductase, low carbon dioxide, 970
protoplast volume, water potential relationship, bound water fraction, 13
*Spinacia oleracea* (*see* Spinach)
*Spirodela oligorrhiza*, stromal and granal lamellae, distribution, thylakoid proteins, 629
Sporophytes, salinized *Ceratopteris*, psychrometric pressure-volume analysis, osmoregulation, 322
Spruce, white, nuclear magentic resonance study, nitrogen metabolism, 193
Starch
banana ripening, 1436
stromal phosphate concentration, feedback limited photosynthesis, bean, 679
Stem, barley, soluble and bound isoforms, invertases, 993
*Steptanthus tortuosus*, antibodies against calcium-binding protein, 1259
Stoichiometry, photosystems I and II, phycobilisomes, *Porphyridium cruentum*, 1179
Stolons, bermudagrass, role of ethylene, geotropic response, 1251
Stomata, sensory transduction and electrical signaling, guard cells, 795
Stress, -induced accumulation, wheat germ agglutinin and abscisic acid, wheat seedling, 1432
Stroma, phosphate concentration, feedback limited photosynthesis, bean, 679
Subtilisin inhibitor, isolation and partial characterization, mung bean, 106
Sucrose
accumulation, biochemical mechanism, regulation in leaves, 656
carbon partitioning during bean development, leaves, fruit and seeds, 291
loading in isolated veins of pea, 259
-phosphate synthase activity, species and environmental variations, tobacco, 469
Sucrose phosphate synthase, acid inveratse and, muskmelon, 1527
Sulfhydryl, reactivity, temperature effect, barley root plasma membrane-enriched microsomes, 1339
Sunflower
after seedhead removal, whole plant senescence, 85
artefactual origins of cyclic AMP, 624
hypocotyl curvature, asymmetric auxin application, 466
variation in binding and virulence, *Agrobacgerium tumefaciens chv* mutants, 113
Suspensors, gibberellins in embryo-suspensor, *Phaseolus coccineus* seeds, heart stage, 362
*Synechococcus leopoliensis*, inhibition of active carbon dioxide transport, hydrogen sulfide, 387
*Synechococcus*, expression of human carbonic anhydrase, 505, 514
*Synechococcus* UTEX 625, inhibition of carbon dioxide fixation, glycoaldehyde, 1044
*Synechocystis*, sequential events in photoinhibition, sodium stress, 91
*Synura petersenii*, chlorophyll *c* involved in light-harvesting, 727

T

Temperature
air, heliotropic leaf movements, bean, 1162
effects on membrane protein sulfhydryl reactivity, barley root plasma membrane microsomes, 1339
growth, chloroplastic galactosyldiacylglycerol molecular species, *Brassica napus* leaves, 924
growth and development, tolerance to high light stress, potato, 1558
high, kinetin and ethylene, thermoinhibition of lettuce seeds, 733
low
high light and gas exchange, jojoba leaves, 1580
metabolic acclimation, winter cereals, 1063
respiration and phosphorylated intermediates, darkened barley leaves, 905
low and high limits, photosystem II, Piperaceae, 1494
low growth, light saturated photosystem I electron transport, monocots and dicots, 1308
*Thlaspi arvense* (*see* Pennycress)
Thylakoid membranes
direct measurement of potassium channels, planar lipid bilayers, spinach, 249
distribution of proteins, stromal and granal lamellae, spirodela, 629
light-dependent energization, inorganic phosphates, spinach chloroplasts, 221
membrane-bound maize coupling factor, characteristics, $Mg^{2+}$-ATPase activity, 1107
photosystem I electron transport, low growth temperature, monocots and dicots, 1308
Thymidylate synthase, dihydrofolate reductase and, coregulation, wild carrot overproducer cell lines, 1168
Tobacco
adaptation to water and saline stress, composition changes, cell wall, 48
artefactual origins of cyclic AMP, 624
auxin-regulated plant defense gene, 73
chimeric isopentenyl transferase gene, cytokinin-to-auxin ratios, morphology of shoots, 808
deregulation of nitrate reductase structural gene, tungstate, 304
extracellular polysaccharides and proteins, water and saline stress, growth-limiting adaptation, 54
inheritance and expression, mouse metallothionein gene, 1020
leaf, biochemical mechanism, sucrose accumulation, 656
mechanisms of cadmium and zinc accumulation, 780
osmotic stress, growth-limited plant cells, cell wall alteration, 39
role of plasmalemma $H^+$-ATPase, $K^+/H^+$ exchange, 298
seed-specific tonoplast protein, distribution, 1006
species variations, sucrose-phosphate synthase activity, 469
specific catalase isozymes, enhanced-peroxidatic activity, 812
stable NaCl tolerance, enhanced accumulation, osmotin, 855
transgenic
bacterial chitinase, 130
cross-resistance, short residual sulfonylurea herbicides, 574
transient gene expression in pollen, 1270
universal pathway of abscisic acid biosynthesis, $^{18}O$ incorporation patterns, 1594
Tomato
auxin physiology of mutant *diageotropica*, 804
cytokinin nucleosidase activity, kinetic comparison, 148
enzymes of ethylene biosynthesis, 1
fruit cell wall, 816
inactivation of 1-aminocyclopropane-1-carboxylate synthase, L-vinylglycine, *S*-adenosyl-L-methionine, 1036
leaf, immunogold localization, proteinase P69, 119
manipulation of membrane fatty acid compositions, 203
NMR imaging and spectroscopy, 1243
pericarp, ethylene action inhibitors, wound-induced gene expression, 157
phosphate starvation inducible metabo-

lism, 175
transient gene expression in pollen, 1270
variation in binding and virulence, *Agrobacterium tumefaciens chv* mutants, 113
wild, sensitivity to chilling injury, altitudinal ecotypes, 1471
Tonoplast
oat root, proton permeability, diclofop-methyl, 756
seed-specific protein, distribution, various plants, 1006
Tricarboxylic acid, cycle, anaerobic carbon metabolism, *Selenastrum minutum*, 1551
Triose phosphate, short-term metabolite changes, transient ammonium assimilation, algae, 749
*Triticum aestivum* (*see* Wheat)
Triton X-114, novel procedure for extraction, latent polyphenoloxidase, grape, 1481
Tryptophan decarboxylase, immunological detection, developing *Catharanthus roseus* seedlings, 79
β-Tubulin, light regulation of gene expression, internode development, soybean, 1157
Tungstate, deregulation of nitrate reductase structural gene, 304
Turgor
recovery and restiffening, water relations, wilted cabbage leaves, 433
sucrose loading, isolated veins, pea, 259
Tweens, -fatty acid esters, manipulation, membrane fatty acid compositions, 203

U

UDP, sucrose-phosphate synthase activity, species and environmental variations, tobacco, 469
UDP-glucose, incorporation into xyloglucan, pea membranes, 373
UDP-glucose sterol glucosyl transferase, reconstitution, maize seedlings, 567
Uronic acid, water and saline stress adaptation, tobacco cells, 54

V

Vacuole membranes, purification of $H^+$-translocating pyrophosphatase, red beet, 34
Vacuoles, uptake of 1-(malonylamino)cyclopropane-1-carboxylic acid, *Catharanthus roseus* cells, 1317
Vesicles, coated, storage protein transport, pea, 674
Vesicular-arbuscular mycorrhizal infection, root respiration and growth, *Plantago major*, 227
*Vicia faba* (*see* Broad bean)
*Vigna radiata* (*see* Mung bean)
*Vigna unquiculata* (*see* Cowpea)
L-Vinylglycine, inactivation of 1-aminocyclopropane-1-carboxylate synthase, *S*-adenosyl-L-methionine, tomato, 1036
Viroid, -induced pathogenesis-related proteinase P69, immunogold localization, tomato leaves, 119
*Vitis vinifera* (*see* Grape)

W

Water
axial and radial hydraulic resistance, maize roots, 719
deficits
reproduction in maize, 862
seed development, soybean, 975, 980
oxygen isotope ratios of cellulose, *Egeria densa*, 536
relations, turgor recovery, wilted cabbage leaves, 433
stress adaptation
cell wall, tobacco, 48
extracellular polysaccharides, tobacco, 54
transport in *Bauhinia fassoglensis*, 1625
Water potential, bound water fraction, protoplast volume, spinach, 13
Wheat
endosperm of developing grains, properties, pyrophosphate:fructose-6-phosphate phosphotransferase, 421
germ agglutinin, production of antibody, propeptide specificity, 473
kinetics of aluminum uptake, 1094
leaf, glycine decarboxylase localization, 1219
mechanisms of aluminum tolerance, 1188
metabolic acclimation in winter cereals, 1063
root plasma membrane proteins, aluminum, divalent cation binding, 233
seedling, stress-induced accumulation, wheat germ agglutinin and abscisic acid, 1432
seed-specific tonoplast protein, distribution, 1006
Wood, compression formation, indole-3-acetic acid distribution, Douglas-fir, 338
Wound
-induced gene expression, ethylene action inhibitors, tomato pericarp, 157
-inducible plant defense gene, auxin regulation, tobacco, 73

X

*Xanthium strumarium* (*see* Cocklebur)
Xanthophyll, cycle components epoxidation state, absorbance changes, cotton leaves, 542
Xylem
axial and radial hydraulic resistance, maize roots, 719
parenchyma of peach, deep supercooling, specific cell wall layer, 151
water transport, *Bauhinia fassoglensis*, 1625
Xyloglucan
incorporation of UDP-glucose, pea membranes, 373
water and saline stress adaptation, tobacco cells, 54

Z

*Zamia pumilo*, seed-specific tonoplast protein, distribution, 1006
*Zea mays* (*see* Corn)
Zeatin riboside, hybrid hybridoma cell lines, hybrid antibodies, 144
Zeaxanthin, photosynthetic pigment analysis, reversed phase-HPLC method, 190
Zinc, cadmium accumulation and, mechanism, tobacco suspension cells, 780
Zinnia, variation in binding and virulence, *Agrobacterium tumefaciens chv* mutants, 113
